

WQMN 3rd Annual Report out now!

Hi all,

I'm excited to announce that the 3rd Annual WQMN Report has now been released!

[You can read the press release summarising the key findings here](#)

It analyses 3 years of WQMN data from July 2022-July 2025. Over this period, the WQMN has become the largest citizen science project in the UK regularly sampling rivers.

A huge thanks to all of you who have got out to collect samples come rain or shine, and driven great campaigns in your catchments and nationwide.

[You can read the full report here](#)

Upcoming Webinar

We will be hosting a webinar on 12th March, 18:30-20:00 to discuss the WQMN Annual Report. Please join if you can.

Microsoft Teams meeting

[Join here](#)

Meeting ID: 324 786 645 060 25

Passcode: Wt6LW3g3

[Need help? Click here](#)

We will be joined by Isla Thorpe, of the University of York, who was the researcher who produced the analysis in the report. Also, Ian Diver from the Test and Itchen Association and Upper Itchen Restoration CIC, who will discuss their fantastic work applying Natural England's lower nutrient targets to chalk

fantastic work applying Natural England's lower nutrient targets to chain streams, which features in the 3rd Annual Report.

As usual, if you are unable to attend, then we will be sharing a recording of the webinar later on.

Keep sending in your stories

Thank you for sending your stories through. We'd love to hear more about what you've been getting up to, so please keep the information coming! Please send to: AAP@AnglingTrust.net

All the best,

Alex Farquhar
