

QMSPO LOGISTICS

ADVANCED UNMANNED SYSTEMS DIVISION

A BULLGOLDSMITH LLC COMPANY

COMPANY OVERVIEW

QMSPO LOGISTICS | Advanced Unmanned Systems Division is an elite corporate-funded federal contractor and operating brand of BullGoldSmith LLC. We engineer and execute premium, secure, and mission-critical **Drone-As-A-Service (DaaS)** platforms. Operating strictly with 100% NDAA-compliant, Blue UAS-cleared aircraft architectures, QMSPO LOGISTICS eliminates global supply chain security liabilities. We provide federal agencies, defense prime contractors, and critical infrastructure operators with secure, sovereign data asset capture across highly jammed, GPS-denied, and hostile threat landscapes.

CORE COMPETENCIES

- **Tactical Supply Chain & Perimeter Security:** Continuous autonomous aerial surveillance, intelligence, and threat mitigation for localized maritime ports, intermodal nodes, and high-value defense production lines.
- **Critical Infrastructure & Energy Asset Protection:** Deploying high-resolution dual electro-optical (EO) and precision FLIR thermal (IR) arrays for deep diagnostics of national utility matrices, oil/gas trunklines, and nuclear perimeters.
- **High-Value Asset Escort & Swarm Monitoring:** Leveraging cutting-edge multi-aircraft decentralized mesh structures to establish dynamic, real-time tactical observation envelopes protecting sensitive logistics transits.
- **Disaster Response & Tactical ISR Capabilities:** Rapid-deployment structural photogrammetry, live damage mapping, and thermal search-and-rescue (SAR) support protocols for federal crisis managers and emergency networks.

TACTICAL FLEET ARCHITECTURE & HARDWARE ECOSYSTEM

- **Persistent Reconnaissance Assets (Teal 2 & Hellcat Systems):** Vetted American-made platforms with specialized Teledyne FLIR Hadron 640R payloads optimized for 24/7 low-light or zero-illumination tracking. Features an extended 50+ minute operational timeline per single sortied airframe.
- **GPS-Denied Navigation Ecosystems (Black Widow System):** Flagship defense-tier short-range reconnaissance (SRR) infrastructure pairing dual airframes with integrated edge-AI threat detection and jam-resistant telemetry parameters.
- **Expendable Distributed Swarms (FANG FPV Fleet):** High-velocity tactical mesh nodes engineered alongside domestic component foundries to enable massive multi-aircraft perimeter saturation, tracking, and threat mitigation profiles.

CORPORATE PROFILE

Legal Entity: BullGoldSmith LLC
Division Brand: QMSPO LOGISTICS
Primary Point of Contact:
Brian Scott Smith, Managing Member
Corporate Headquarters:
20416 Old York Road
White Hall, MD 21161
Direct Corporate Email:
brian@bullgoldsmith.com
Primary Web Access:
www.bullgoldsmith.com

PROCUREMENT DATA

SAM.gov UEI: P9G1AZ294JM3
CAGE Code: 07G51
FEIN: 88-0815885
FMCSA ID: Property Broker Authorized

FEDERALLY TRACKED NAICS

541990 (Primary): All Other Professional, Scientific, and Technical Services
541370: Surveying & Mapping Services
488190: Support Activities for Air Transit
541614: Logistics & Supply Chain Consult
561612: Protective Security Patrol Services

PRODUCT SERVICE CODES (PSC)

T099: Photo / Map / Imagery - Other
R425: Engineering & Technical Support
S215: Housekeeping - Guard & Security
V112: Logistics - Motor Freight
V111: Logistics - Air Freight

COMPLIANCE MATRIX

100% NDAA COMPLIANT
BLUE UAS ARCHITECTURE
FAA PART 107 FLIGHT CREWS
ASDA COMPLIANCE RATIFIED

This document is for informational procurement purposes only. All flight tracking arrays, sovereign component alignments, and technical platform allocations are maintained in compliance with the American Security Drone Act (ASDA) and ITAR oversight configurations.
