COLEMAN HISTORY

THE LANTERN IN THE WINDOW

Our story started in Alabama on a cold, winter's day in 1899. While visiting customers, a young typewriter salesman named William Coffin Coleman spotted an incredibly bright lantern glowing inside a store window. After studying it, he learned it was called **the Efficient Lamp**. It was powered by pressurised gasoline and had a mantle (instead of a wick) that burned brightly and consistently. So impressed by the lantern's ingenuity, **Coleman quickly agreed to become a salesman** for its inventors. **However, he soon discovered not everyone shared his enthusiasm for this clever, new product.** It seemed the reputation of gas-powered lanterns had taken a hit and people were unwilling to risk investing in another bright idea.

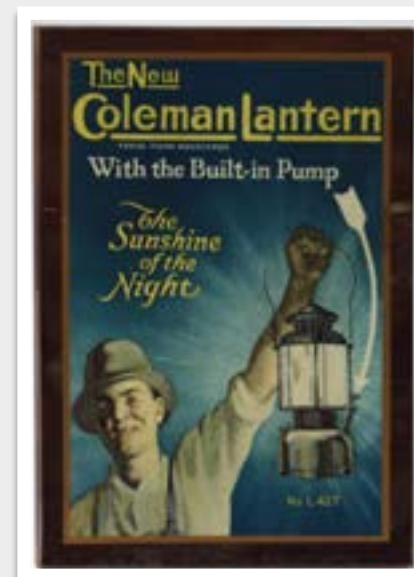

THE SECRET OF GOOD SERVICE

Coleman knew there had to be a solution. **While pondering, he recalled an old sales mantra that the first principle is to sell the service your product provides, rather than the product itself. That was it!** He'd prove the lanterns' reliability by offering a lighting rental service that included maintenance and refuelling.

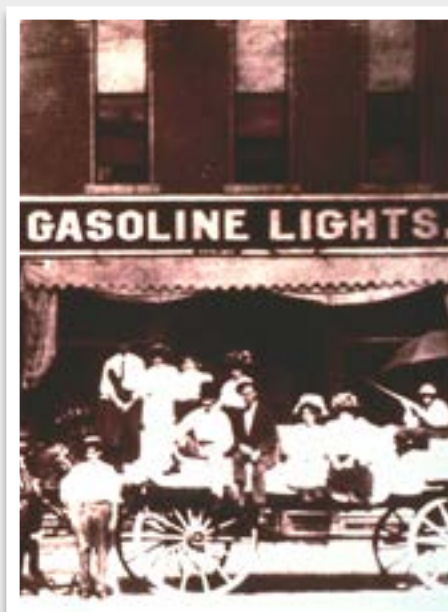

The Hydro-Carbon Light Company was born and soon afterwards, Coleman's lanterns were seen lighting up windows all over town. As the years passed, **Coleman improved the design**, making it leak-proof and easier to clean. **Eventually, he became owner of the lantern's patent**, renamed it the Arc Lamp and moved the company's head-quarters to Wichita, Kansas.

LIGHTING UP THE FOOTBALL FIELD

Providing access to bright, reliable light anywhere was at the core of Coleman's business and in 1905, another **innovative idea** led him to the football field of Wichita State University. Pioneering the idea of playing sports under artificial light, **Coleman lit the stadium with his lamps strung up on high poles all around the pitch. This was the first time Coleman's lights were used for outdoor leisure** and in the years following that historic match, our product range grew significantly. In 1913, we were renamed the **"Coleman Lamp Company"**.

COLEMAN JOINS THE WAR EFFORT

The **start of WWII** was a pivotal moment in our story. All US manufacturing was diverted to support the war effort and Coleman's production was no exception. **We were tasked with designing equipment for the troops, including a reliable, compact stove that could run on any fuel and in any temperature.** Our mechanics worked round the clock and created the **Model 520 Pocket Stove** (later nicknamed the **G.I. Pocket Stove**). Those war-year innovations cemented our reputation for reliable equipment, paving the way for some of Coleman's most legendary products.

INNOVATIONS FOR GENERATIONS

In the decades that followed the war, Coleman grew into the outdoor company people know and love today. Holding on to WC Coleman's sense of resourcefulness, **we've never stopped innovating. During the 1950s we revolutionised taking food into the great outdoors with the introduction of our portable, plastic-lined cool boxes** and in the decades that followed **tents, chairs and sleeping bags** were added to our range.

All our products share one simple aim, to enable and inspire people to get outside. Over the years, we've made this aim a reality through the use and development of numerous technologies and product innovations. From **being the first to add taped seams to our tents** in

the 1990s, to the introduction of fire-retardant fabrics throughout our range in the year 2000. In 2016, we revolutionised sleeping on the campsite with the launch of our game-changing **BlackOut Bedroom™ technology.** Now found on many of our bestselling models, this patented feature guarantees a dark, temperate sleeping environment at any time of day.

OUR FUTURE WITHIN THE NEWELL FAMILY

Today, **the Coleman brand is part of the Newell family** and our products have travelled from Wichita to countries all over the world. Keeping W.C. Coleman's original entrepreneurialism and ingenuity at our core, **we continue our mission to make the outdoors a place for everyone.**

So, what are you waiting for?

THE OUTSIDE IS CALLING.

A photograph of a family camping in a forest. A green and blue Coleman tent is set up on a grassy clearing. A man is sitting in a black folding chair to the left of the tent. A woman and two children are standing near the tent. The background is a dense forest of tall, thin trees with green foliage. The sky is visible through the canopy.

Enjoying the **OUTDOORS IS EVERYTHING...**

First and foremost our passion is the outdoors and as a result, our inspiration for innovation is driven by the diversity of what the outdoors has to offer.

Globally, we are committed to encouraging more people to go outside; it's the ethos behind our day-to-day thinking. Therefore, we are committed to innovation, introducing each year new products and technologies that will inspire you to explore your outdoors.

Whether you enjoy relaxing with friends and family outdoors or your personal passion is facing nature in more extreme conditions, **our product range will have the correct tools to support your individual adventure.**

A brand you can trust, it's a trust that's been earned **over the last 100 years** and it's a virtue that has stayed with the Coleman Company® through generations thanks to our commitment to delivering the highest quality products.

Each product is backed by an extensive research, **development and testing program** to ensure that regardless of the conditions you face, you will have a product you can rely on time and time again, even if your life depends on it. Every component is put to the test and scrutinized long before it reaches the outdoors guaranteeing that it will cope with the extremes of nature.

We are employing engineers and run test facilities all over the world with the sole intent to provide you with a product that can stand the toughest test protocol of all – your expectation. Our combination of laboratory and real world testing ensures that you can have confidence in every single component. Whether it's a roll test, a wind tunnel test or even 100% inflation test on all inflatable products.

Our testing often goes beyond the legally required minimum standard, we'll go the extra mile to ensure that our products help you to enjoy the outdoors.

TENTS & SHELTERS

WE HAVE SOMETHING FOR EVERY CAMPER

Here at Coleman® we know that your tent and shelter are key to enjoying everything the outdoors have to offer. We manufacture a wide range of products, all manufactured to our high standards and offering unique features that you can only find with us!

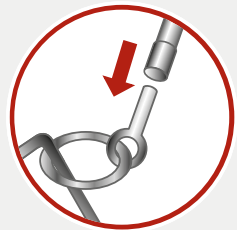

A GUIDE TO OUR TENT & SHELTER FEATURES

TENT & SHELTER SET-UP SYSTEMS

FASTPITCH™

FastPitch™ tents are designed to be quickly set-up for when you have no time to spare. These tents often have frames that can be set up considerably faster than your usual tent, making them great for last minute getaways.

RING & PIN

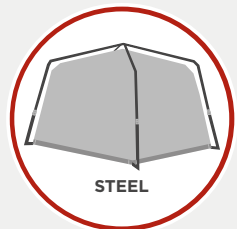

An assembly system used on tents where long pins are attached to the corners of a tent, which are then inserted into the hollow ends of tent poles. The pole goes over the pin and stays in place for a convenient and easy set up.

TENT & SHELTER POLES

FIBREGLASS POLES

Highly flexible and lightweight fibreglass poles guarantee a good response to wind and storms.

STEEL POLES

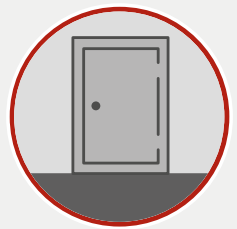

Steel poles are incredibly sturdy and hardwearing, and offer increased strength for larger family tent structures.

ENTRANCE FEATURES

HINGED DOOR

The patented Hinged Door from Coleman® makes it quick and easy to enter and leave the tent. The rigid door and its door frame increases the tents structural integrity making it feel more like at home away from your home. Ideal for family and group camping, you can close the tent door without needing to zip it, making your tent and belongings more accessible without having everything on display or needing to continually use noisy zippers when entering or leaving.

TWO DOORS

These tents feature an additional door with front and rear access.

TENT & SHELTER FABRIC

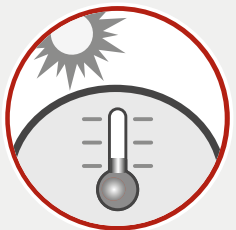

UV GUARD™ SUN PROTECTION

Certified laboratory testing proves that Coleman® UVGuard™ protection fabrics with an SPF50 provide excellent protection against the sun's ultraviolet rays. Proper use of sunscreen combined with shelters and tents made with UVGuard™ protection fabric is recommended against sun exposure.

UV FABRIC PROTECTION

Offers fabric protection from UV rays and increased fabric longevity.

TEMPERATURE REDUCTION

With 99.9% UV protection (up to 7x more protection than other shelters), our shelters also reduce the temperature up to 5°C* with an advanced coating of the inner fabric and sunwalls for a higher level of UV protection with a UPF 50+.

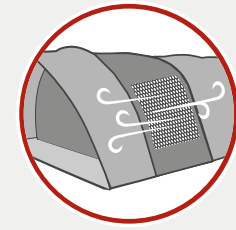

FIRE RETARDANT

Our material ensures that the fabric will not flare dangerously out of control and will self-extinguish, giving time to escape in the event of an emergency.

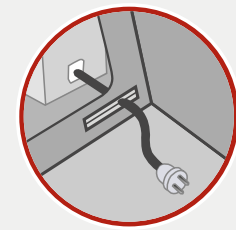

*Compared to the same shelter without advanced coating technology, measured at 1.80m above ground level.

OTHER FEATURES

MESH VENTILATION

Ensures air flow through the tent while keeping bugs outside.

CABLE OPENING

Convenient openings in the tent wall that allow easy accessibility to a power source outside the tent.

FAMILY TENTS

GET BACK TO NATURE

Our extensive range of family tents will provide your family with a comfortable home from home whilst spending time in the great outdoors. From our impressively spacious, top of the range tents to more compact models ideal for budget conscious touring campers, every Coleman® family tent offers comfort and protection on the campsite.

Octagon Series

The Cortes Octagon 8 provides a full 360° view of your surroundings. Ample living space and the ingenious hinged door gives it a homely feel on the campsite. This spacious tent has a multitude of uses, it can be dressed as a luxury glamping bedroom, a playroom for the kids or a perfect tent for festival gatherings. The flysheet can be removed and the Octagon 8 transforms into a bug-proof screened room perfect for the garden. The tent comes with a wheeled carry bag and packs down compactly for easy transportation and storage.

Total	15.7 m²

Skydome Darkroom

With a quick setup under 5 minutes, the Dark Room™ Skydome™ Camping Tent lets you enjoy more time with friends and family on your next camping trip. There is plenty of room to stretch inside the spacious interior thanks to the nearly vertical walls that offer 20% more headroom than a traditional Coleman® dome tent, and a wide door design means you can move air beds, sleeping bags, and other gear in and out with ease. Plus, Dark Room technology blocks 90% of sunlight and reduces heat inside the tent (vs. a comparable Coleman tent) so you can rest at any time in comfort.

- Quick set up under 5 minutes so you can spend more time relaxing
- Wide door for easy access
- Mesh storage pockets to keep your valuables close to hand
- Dark Room Technology™ blocks 90% of sunlight and reduces heat in the tent so you can sleep in longer or put the kids to bed earlier
- WeatherTec™ system's welded corners, inverted seams and taped seams on rainfly and tent body help keep water from getting in

SHELTERS

WE'VE GOT YOU COVERED

Extend your living space outdoors with a Coleman® Shelter. Featuring a distinctive, stable design, Coleman® shelters not only offer protection from the sun and light rain, but also from the wind thanks to our exclusive WindStrong™ System. For even greater privacy, Coleman® shelters can be pitched with a selection of model-specific accessories. All that is left for you to do is sit back, relax and unwind in the comfort of your own defined outdoor space.

Event Shelter Pro

The Event Shelter Pro combines a sturdy structure with a flysheet featuring taped seams for increased water resistance. It includes Coleman® UVGuard™ for increased protection against UV rays and an advanced coating of the inner fabric shelter for temperature reduction. The Event Shelter Pro is available with a range of coordinating accessories for added flexibility during your outdoor event.

COOLERS

AN ESSENTIAL PART OF EVERY SUMMER

At the backyard barbecue, on the worksite, at the beach, on your camping or fishing trip, you just can't get by without them. Whether you need a chest, personal or wheeled cooler; you can count on Coleman® products to keep your food and drinks cold. Our chest coolers have enough room to hold 2-litre bottles upright, specially designed lids, easy-carry handles and durable construction. Just what you've expected from Coleman®.

Marine Coolers

A must-have for fishermen, Coleman Xtreme™ Marine Coolers are designed specifically for use in the hot sun. UVGuard™ reflective colour additives protect the cooler, fighting against yellow discoloration and cracking caused by sun exposure. The Xtreme™ Coolers feature stainless steel hinges to avoid rust when bringing them on your next boat ride. Combined with all of the Coleman Xtreme™ cooling-qualities, these coolers are perfect for outdoorsmen, fishermen, or a day at the beach!

28QT Xtreme™ Marine Cooler

Xtreme™ Coolers

Our new range of Coleman Xtreme™ coolers comes with an updated look and modern shape. They are designed to keep large volumes of food and drinks cool for up to five days in high temperatures. These high performance coolers are in it for the long haul and are perfect for your family at the campsite, on a picnic, or for those long summer barbecues. High performance is guaranteed thanks to the thick, injected polyurethane insulation, filling every gap of the cavity, and ensuring there are no areas of weakness. Models from 50qt and larger have an additional insulation in the lid to increase the cooling performance even more. As an added feature, robust lids are strong enough to be used as a seat for up to 113kg!

Max. weight capacity	295 kg
Material	PVC with reduced amount of phthalates (4NP)
Features	Double Lock™ valve
Accessories	Repair kit and carry bag included
Weight	3.6 kg

SLEEPING BAGS

GUARANTEE A GOOD NIGHT'S SLEEP

Choosing a sleeping bag is one of the most important decisions you'll make when preparing for your outdoor and camping trips. A good night's sleep ensures you can enjoy your days spent outdoors and get the maximum out of your holiday. With this in mind, we have designed our Coleman® sleeping bags focusing on comfort, warmth and portability. Whether you're camping with your family or trekking away from the beaten track, the Coleman® Sleeping Bag range has the right solution for you.

A GUIDE TO OUR SLEEPING BAG FEATURES

SLEEPING BAG FEATURES

PILLOW POCKET SYSTEM

Place your pillow perfectly under your head inside the sleeping bag.

3D FOOT AREA

For more room and comfort for your feet.

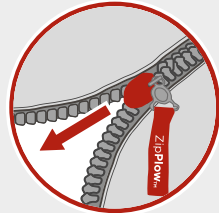

INNER POCKET

Sleeping bag has an inner pocket to hold valuables or small items.

THERMO COLLAR

Provides extra warmth and insulation near the hood where air can escape.

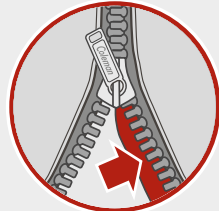

ZIPFLOW

Prevents the zipper snagging by ploughing fabric away from the zipper.

AUTO-LOCK ZIPPER

The auto-lock system prevents the zipper from unzipping itself by locking in place.

THERMOLOCK ZIPPER BAFFLE

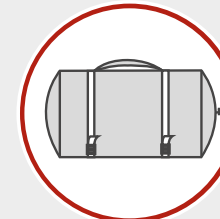

The Thermolock construction reduces heat loss through the zipper, keeping you warmer.

COMFORT CUFF

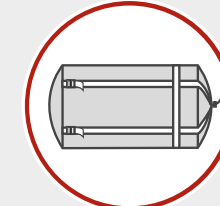

Surrounds your face with softness.

PACKING SOLUTIONS

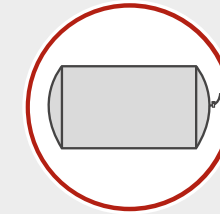

2-WAY COMPRESSION BAG

The 2-way compression stuff sack reduces the size further once packed by pulling the two compression straps. Allows compression even for spacious sleeping bags.

4-WAY COMPRESSION BAG

The 4-way compression stuff sack reduces your sleeping bag to a very small size once packed by pulling the four compression straps.

NORMAL STUFFSACK

Simple stuffsack to pack mummy or rectangular sleeping bags.

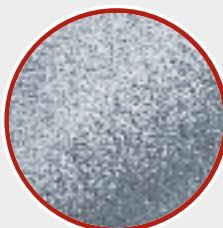

A GUIDE TO OUR SLEEPING BAG FEATURES

SLEEPING BAG INSULATION

COLETHERM™

A synthetic insulation with hollow fibre insulation providing better heat retention with less weight and a smaller pack size. Machine washing does not affect its performance.

BRUSHED POLYESTER

Specially treated synthetic fabrics that look and feel like fine cotton comfort flannel whilst retaining all the advantages of polyester fibres: lightweight, moisture resistant, durable and antibacterial.

COLETHERM™ MICRO

This high performance synthetic insulation is very light and compressible, resulting in extremely compact pack sizes. It is a bonded micro fibre insulation that works by trapping air around the fibre for a more effective performance. It offers a great heat to weight ratio and as it is a bonded insulation it has reduced fibre migration, eliminating cold spots.

Testing & Comfort Levels

Coleman® sleeping bags are all tested conforming to the European Norm for sleeping bags, specifically § Thermal Properties. This evaluation is done by placing a dressed thermal mannequin (top, bottom and socks) in the sleeping bag. This bag with the mannequin is placed on an artificial calibrated ground and set up in a climatic chamber. By determining the heat loss of the mannequin and through physiological models, the thermal resistance values as well as the temperatures of use are calculated.

On all Coleman® sleeping bag hang tags and in this catalogue you will find a temperature scale which describes the comfort levels of our sleeping bags.

-2°C

+10°C

+14°C

The lower extreme temperature where the risk of hypothermia occurs. This temperature is calculated for a person with characteristics of a standard woman in a situation of high cold stress which can be maintained only for a limited duration of 6 h. The sleeping bag user is curled up in the sleeping bag so as to minimize thermal loss through the sleeping bag.

The lower limit at which a sleeping bag user with a curled up body posture is globally in thermal equilibrium and just not feeling cold. This temperature is calculated for a standard man in a curled up posture inside the sleeping bag, but in thermal equilibrium and just not feeling cold (no shivering).

The upper end of the scale describes the temperature to which a sleeping bag user with a relaxed posture is globally in thermal equilibrium and just not feeling cold (related to a standard female under standard conditions).

Palmetto

The Palmetto sleepingbag is equipped with the Comfortsmart technology - guaranteed to keep you comfortable.

ELECTRIC LIGHTS

BRILLIANCE COMES AS A STANDARD

Since 1901, Coleman has been lighting families' homes, workplaces, and campsites. As sure as the sun rises in the east and sets in the west, you can count on Coleman® lanterns, flashlights and utility lights to brighten the night.

Flashlight

Don't be caught with a dead battery again! The simple and easy-to-use, patent-pending BatteryLock™ flashlights are capable of storing battery power for years. With a simple twist the battery is disengaged, preventing residual battery loss and extending battery life.

GAS & STOVES

BUILT TO LAST A GENERATION... OR TWO

Coleman® stoves are designed with the active camper in mind, and are amazingly easy to use. We never stop thinking of ways to make the meals you eat when backpacking the best it can be, and the whole camping experience more fun for everyone.

A GUIDE TO OUR FUEL, LANTERN & STOVE FEATURES

FUEL, LANTERN AND STOVE FEATURES

Bringing comfort, warmth and light to the campsite, Coleman® multi-fuel and liquid fuel stoves and lanterns are strong and reliable. They are build to last and designed to work even in demanding conditions. The range of Coleman® Backpacking Stoves addresses the key needs of today's explorers. Light-weight products without compromising on performance, even in challenging conditions. The new range offers different stoves to choose from, all running either off Coleman's® Performance Gas or the Coleman® Xtreme Gas blend which boosts the stoves performance in cold conditions.

WHICH FUEL TYPE IS RIGHT FOR YOU?

COLEMAN® LIQUID FUEL

Also called white gas or camping fuel, you can't beat it for camping in the winter or at high altitudes. Burns hot even at subzero temperatures. And unlike butane and propane, output doesn't falter as temperatures drop. Coleman® Liquid Fuel is very refined, and is cleaner than other liquid fuels. It's relatively inexpensive and not difficult to come by. By carrying the fuel in small refillable fuel bottles, you don't have the disposal considerations you do with empty propane or butane cylinders.

Main advantages: **heat output and economy.**

BUTANE/PROPANE FUEL

Butane/Propane mix cartridges are lightweight, resealable, and easy to connect. Most Backpacking Stoves are cartridge appliances to minimize weight by avoiding fuel tanks or regulators.

Cold temperatures as well as declining fill levels during use affect the pressure in the cartridge, so performance is best in mild to moderate conditions. To compensate that Coleman® has launched the Xtreme Gas blend which particularly serves the needs of Backpackers in more challenging outdoor conditions. Xtreme Gas evaporates gas up to -27°C.

Main advantages: **convenience and light weight plus Performance (when using Xtreme).**

PROPANE

Propane is very convenient and easy to use. Just attach the fuel cylinder to the appliance and you're in business. Coleman equipment is pressure-regulated at 15 psi to ensure steady output throughout the life of the cylinder. Propane offers great overall reliability especially in cold temperatures and at higher altitudes. Propane isn't the lightest weight option but it offers great performance.

Main advantages: **convenience and performance.**

SPECIFICATIONS

DUAL FUEL™

The Dual Fuel™ design is less expensive to run, it uses less fuel than propane-powered lanterns, and are more reliable, with better dependability in the coldest conditions- operating both on Coleman® Liquid Fuel and unleaded gasoline.

WIND BLOCK™

Wind Block™ offers 360° wind protection from your flame

HYPERFLAME™

HyperFlame™ burners use a stair-stepping design and added flame holes for faster, more even cooking

POWER

Indicates the performance of the appliance in Watts at full flow

BOILING TIME

Indicates the amount of time it takes to boil 1 L of water

RUNTIME

Indicates the duration of time from initial ignition of appliance using a fresh gas/fuel source, until the appliance runs out of energy, operating the appliance at full flow

PRODUCT WEIGHT

Indicates the net weight of the product

LUMENS

Light output is the total “luminous flux” emitted by a source and is a measure of the brightness of portable lights. The higher the lumen value, the brighter the light

Coleman® Fuel

Coleman® cartridges offer two different dedicated gas blends: Coleman® Performance for usage in moderate climates and altitude, Coleman® Xtreme for usage in cold conditions and higher altitudes. Both blends come in threaded, self-sealing cartridges with a safety valve.

C300 Xtreme
Xtreme Gas ensures peak performance even at very low temperatures, evaporating gas even at -27°C. Boosts boil time with less gas consumption.

Cartridges

Energy for your outdoor-living!
Powerful & convenient.

From lightweight stoves on backpacking adventures to powerful cookers at your favourite campsite; from gardening equipment to your hobby or DIY devices; our cartridges are your source of energy. Easy to handle, safe and efficient!

WHY YOU CAN RELY ON CAMPINGAZ®

Campingaz® is one of the European pioneers when it comes to portable energy solutions. Since 1949 Campingaz® branded products enable people to enjoy living and cooking outdoors.

The Campingaz® cartridges

- Available as Butane and Butane/Propane blend
- Available as a pierceable cartridge with innovative Gas Lock system (as of 2014)
- 100% quality controlled in Europe
- Available with the patented Easy Clic® Plus valve system for utmost consumer comfort
- Dedicated cartridge solutions for distinct products like table top stoves and DIY tools
- Available all over Europe and beyond

With Campingaz® you never run out of gas!

CHOOSE THE RIGHT GAS...

Valve cartridges

Featuring a self-sealing valve, they can be disconnected and reconnected even when not empty!

Pierceable cartridges

Economical single use cartridges that cannot be disconnected from a product until the cartridge is empty.

2 SECURE CONNECTION TYPES

Easy Clic® Plus, an even more convenient system made for valve cartridges – simply rotate 45° to get connected!

The Easy Clic® Plus connection is the most simple and technically sophisticated connection which allows the fixing of a valve cartridge on a stove or on a lantern with a simple 45° rotation.

1- Fix

Applying a small amount of pressure on the device with the cartridge is enough

2- Turn

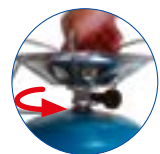

Apply a 45° left turn on the device and you're connected!

Screw in system for the cylinder connection

1- **Insert** the device in the valve head of the cylinder

2- **Turn** right to screw it in and connect, turn left to unscrew

VALVE CARTRIDGES

Our range of valve cartridges have a high security self-sealing valve giving them all the advantages of being resealable – so they can be disconnected and reconnected even when they're not empty. Ideal for periodic, moderate use.

Butane/Propane mix

Recommended for better performance at low temperatures.

CP250

For Bistro® type stoves.

- contains 220g of Butane/Isobutane mix
- Size (without cap) ø 6.9 x 18 cm
- Weight: 315 g

Ref: 2000022381

CV470 Plus

- Contains 450g Butane/Propane mix (80/20)
- Size (without cap) ø 11 x 14 cm
- Weight: 710 g

Ref: 2179821

PIERCEABLE CARTRIDGES

Pierceable cartridges can't be disconnected once they've been plugged into an appliance, so they're suitable for more intensive or longer use – they're also our most economical and widely available cartridges.

C206

- This C206 cartridge does not include the Gas Lock System and will be kept available only for markets not following the EN417:2012 standard.
- Contains 190g Butane
- Size (without cap) ø 9 x 9.5 cm
- Weight: 280 g

Ref: 3000006403 - Butane
EAN: 03138520182009

Versatile Urban & Caravan Grilling

Whether you are looking for a space saving grill for your city balcony or practical cooking gear for your caravan kit, we've got the right grills for you.

Explore our wide range of grill and stove combos perfect for small urban outdoor spaces or cozy evenings while on a caravanning adventure. All grills and stoves are supported by our globally available range of gas cartridges and cylinders. Whichever you choose, you can be sure that they're reliable, safe and practical.

BISTRO STOVES

A modified version of the famous Camp’ Bistro with a new pan support: very easy and convenient to use. This robust stove comes with its own hard-plastic carry case.

DIY

Whether you want to work in and around the house, tidy up weeds and light bonfires, we'll help you enjoy your time in your house and the garden. Campingaz products for DIY are designed to make life easier.

You can use blowtorches on a whole range of jobs, from stripping paint to clearing weeds or even just starting a bonfire.

PIERCEABLE CARTRIDGE BLOWTORCHES

The Pierceable blowtorches, in particular the Soudogaz® X2000 and the Soudogaz® X2000 PZ, are our bestsellers among blowtorches, they are our icon products and well-known for years. They are extremely versatile tools, ideal for many types of DIY jobs. The Soudogaz® X2000 models are equipped with a metal housing, for a greater protection of the cartridge and for longer durability. The cartridge can be easily loaded and connected. The nozzle is in brass and it can be easily removed; it is compatible with separately sold multifunction accessories. The blowtorches have a comfortable grip and the power can be adjusted precisely.
