American owned, Greek made: Vegan Luxurious Skincare for the whole family!

-recyclable/reusable glass containers: much safer than plastic for you and the environment

I chose to have my products created in Greece because the soil is organic and rich in minerals, giving the herbs increased tannins and less risk of contamination in the soil, and Chios is the Island where Mastic trees grow. Areas of Greece are also considered “blue zones” where the healthiest, longest lives are lived, and I am forever inspired and grateful to the incredible people of this country.

Benefits of tannins: Not only do they have anti-oxidant effects (healing and anti-aging) they also reduce bacteria, fungus (yeast/candida), and viruses which are often the culprit/problem for troublesome skin.

Benefits of Mastic Resin: The Magic of Mastic! You will find this resin in all of my products as it tones and tightens skin but is also extremely healing due to its anti-viral and anti-microbial effects.

Note: always read labels and review ingredients to avoid any allergies you and your family may have (our products contain almonds, sunflower, Shea butter etc.) and just because the ingredients are all vegan and mainly organic does not mean they aren't a potential allergen. ***For clients with sensitive skin try products on one dime size location on skin for 24 hours before using all over. Our products contain no added fragrances, scent is from herbs/flowers, and fruit ingredients.
