KegMaster Solstice Indoor/Outdoor 12 Volt DC Kegerator

KegMaster Solstice Kegerator

If you're looking for a spacious **6 keg kegerator** that combines economical power usage, environmentally friendly operation and clever design features that fit your lifestyle, you won't find a more versatile kegerator than the **heating and cooling** KegMaster Solstice.

Solstice is unlike any kegerator ever designed. With the option to run on **DC power**, **KegMaster Solstice can cool your kegs with solar power or batteries**. You can also simply plug KegMaster Solstice into a normal 10amp household outlet and enjoy beverages on tap from this beautiful, all stainless steel kegerator.

Perfect for remote operation in caravans, on boats, mobile bars, festivals and food service vehicles. KegMaster Solstice is also perfect for golf courses homes, offices, cafes and bars.

Designed in Australia by Keg King Engineering, the KegMaster Solstice delivers a powerful new approach to serving beverages on tap and fermentation temperature control.

Includes MKX CO2 Regulator - Our gas regulator is included with the Solstice fridge making it easy to set up your draft system.

Visually Stunning - KegMaster Solstice is constructed of **304 stainless steel** providing visual impact and easy to maintain, sanitary surfaces inside the kegerator, on the outside walls and benchtop.

KegMaster Solstice – Indoor/Outdoor Kegerator

Power Flexibility - The 12-volt DC design of KegMaster Solstice can integrate seamlessly with your lifestyle and space. The included 110/240V DC power pack provides home users with the ability to simply plug their KegMaster Solstice kegerator into any standard 10amp power outlet.

Cooling or Heating – With its high performing HJ-510 temperature controller, your KegMaster Solstice can be set up to run heating or cooling modes and can also set the defrost cycle. An internal cold air hose is included for font cooling. This dual temperature feature provides users with the ability to use the heating for fermentation or curing of small goods, or switch to cooling mode to bring kegged beverages down to serving temperatures quickly for draught tap dispensing. Simply set the controller to the temp you require and the KegMaster Solstice will keep that temp accurately and efficiently.

Unique Cassette Design – The innovative heating and cooling cassette design of the KegMaster Solstice provides a simple solution to quick, quiet temperature cycles. The cassette can easily be removed and replaced if required by simply removing six screws that attach the cassette to the kegerator body. The walls and benchtop of the KegMaster Solstice contain no coolant lines. All cooling and heating are provided to the kegerator from the cassette.
