

Business Explanation and Timeline June 12th – December 10th 2023

“Infinite Power Clean Energy (Fiji) PTE LTD” (IPC) provides “Ultra-Modern Wind Turbines” and “Waste to Energy Power Plants” to South Pacific Island Nations to help reduce the extremely high cost and un-reliability of diesel generators, solar panels, hydro-dams and even local power grids to help save the environment and also combat the negative effects and impact of “Climate Change”.

Infinite Power Clean Energy signed a “Power Purchase Agreement” (PPA) with The Ministry of Fisheries and Forestry on November 23, 2023 that will allow IPC Energy to invest \$55 Million USD for the manufacturing and installation of 27- Ultra-Modern Wind Turbines totaling 19.75 Megawatts in 27 different locations around the Fiji Islands.

\$122 million 'ultra-modern' wind turbines

By DIONISIA TABUREGUCI

AN American clean energy company is bringing state-of-the-art "ultra-modern" wind turbines that it says will be a game changer in Fiji's renewable energy landscape.

Infinite Power Corporation, through its Fiji subsidiary Infinite Power Clean Energy (Fiji) Pte Ltd (IPC), signed a Power Purchase Agreement (PPA) with the Ministry of Fisheries and Forestry last week, sealing a deal to install its turbines in 27 locations around Viti Levu, Vanua Levu and Rotuma.

"Our wind turbines are ultra-modern because they're not two or three blades propeller-looking turbines like the ones from the past," said IPC founder and chief executive officer Robert Beam.

"Ours have hundreds of 'wings' within a ring, so it's actually a wing ring that is made of stainless steel and aluminum parts and it only takes one mile an hour of wind to make it produce electricity."

The Agreement with the Ministry of Fishery and Forestry will allow IPC to invest \$US55 million for the manufacturing and installation of 27 "ultra-modern" wind turbines totaling 19.75 Megawatts in the 27 locations.

"These are actual locations that the Ministry of Fisheries already owns and they currently have diesel generators running at these locations," Mr Beam said.

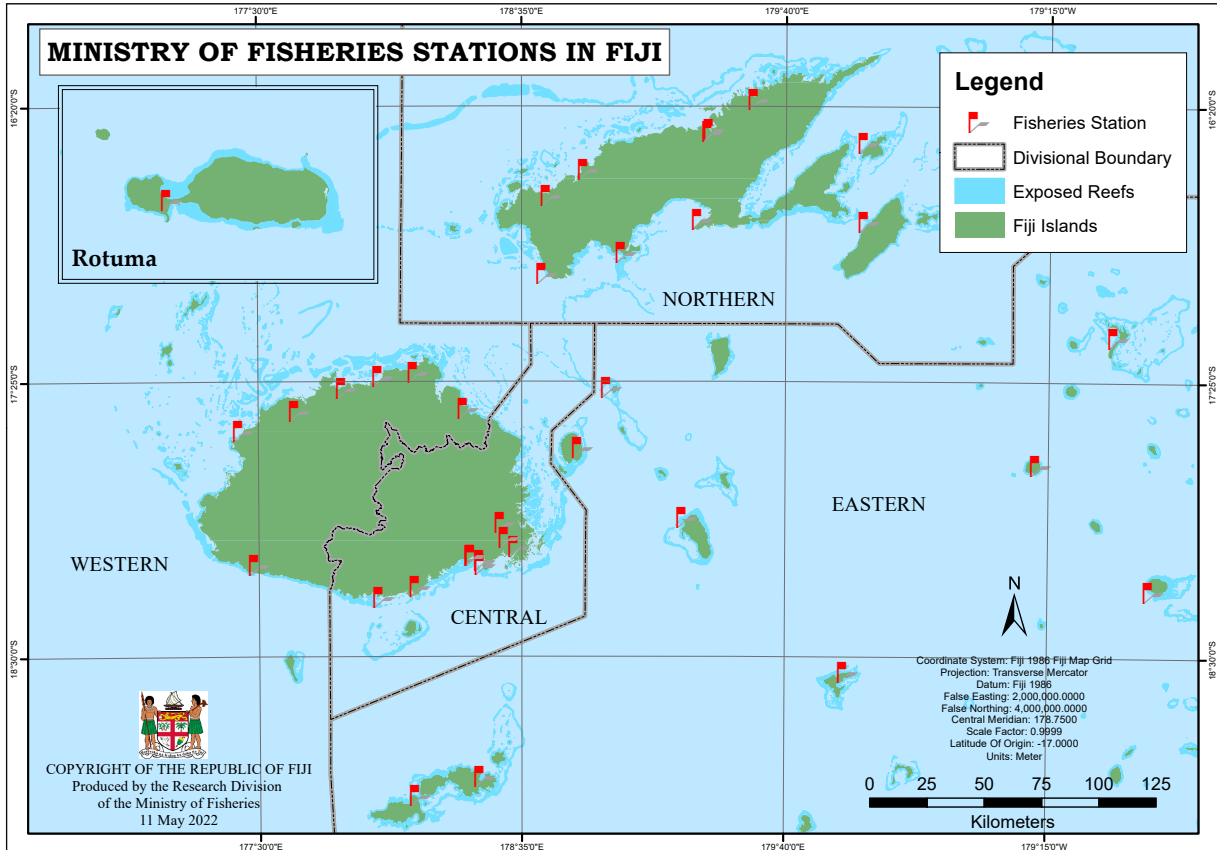

"We are just going to replace the diesel generators with wind turbines. We'll power ice plants for the fishermen. It's very expensive to run a diesel generator 24 hours a day to keep ice plants going. So this will stop the bleeding because most people with diesel generators are bleeding to death financially."

Mr Beam says their proprietary wind turbine technology is unique in that its generators produce AC and DC power at the same time and has the capacity to "hold a full charge for two to three weeks, even if the wind are to stop blowing for any reason."

IPC founder and chief executive officer Robert Beam, left, with Ministry of Fisheries and Forestry permanent secretary Ateleite Rokosuka and IPC local director Sitiveni Nawaga. Picture: SUPPLIED

Wind turbines to power sporting facilities

 Peceli Naviticoko
Multimedia Journalist iTaukei Desk
peceli.naviticoko@fbc.com.fj

NOVEMBER 29, 2023 4:27 PM

The Fiji Sports Council has taken a sustainable move and will soon transition to using ultra-modern wind turbines to source clean, green, renewable energy for all facilities and arenas under the Fiji Sports Council.

This follows the official signing of the \$57 million Power Purchase Agreement with Infinite Power Clean Energy.

IPC Energy, The Ministry for Fisheries and Forestry and Fiji Sports Council have joined forces to help eliminate the extremely high cost of operating diesel generators and the un-reliability of Solar Panels by providing Clean, Green, Renewable Electricity using **IPC's Ultra-Modern Wind Turbines** to power Ice Plants, Government Stations and even entire Villages where there is currently very little or even no power at all along with **Fiji Sports Council's Facilities and Properties**.

IPC's Ultra-Modern Wind Turbines can generate electricity with only 1 mph of wind and they keep on producing with up to 250 mph of wind. They work 24/7/365 during the daytime and night time while it is sunny or dark, cloudy or raining and even during storms. They use magnetic bearings so there is no friction or noise and they require very little maintenance and zero-fuel cost. They also come with a Mega-Battery installed underground that provides continuous un-interrupted power for 2 to 4 weeks even if the wind were to stop blowing.

These projects will be life-changing for thousands of Native Indigenous Fijians who live in these areas while simultaneously helping to save the local environment and an enormous amount of money for **the Ministry, Fiji Sports Council and the Fiji Government**.

You would think that everyone in Fiji would love to see these two Renewable Energy projects take place but the day after the articles hit the newspapers the Deputy Prime Minister of Fiji held another press conference to tell the world on video and social media that the PPAs were being **“cancelled”** and were **“Un-Enforceable”** because of some **“Due Process”** that wasn't followed.

The Timeline and “Due Process” of these two projects began 6-months ago on **June 12th 2023** when Mr. Beam flew into Fiji with “Waste to Energy” and “Ultra-modern Wind Turbines” Technologies to share with the new Prime Minister and government and even Energy Fiji Limited (EFL) knowing that once they saw how incredible they were that they would agree to support them.

Upon arriving in Fiji, Mr. Beam was introduced to Mr. Nawaga by a family friend from Vatulele Island who recommended that he could help since he was a successful local Indigenous Fijian Businessman that owned a transportation company called “Mick’s Fiji Tours. After meeting, the two entrepreneurs decided to pursue the business together because they were such great projects for the government, the people and the nation of Fiji.

They began sharing the Technologies with everyone they could starting with Mr. Joni Rey at the “People’s Alliance Party” Headquarters on **June 17th 2023**.

After seeing how incredible the technologies were Mr. Joni and Mr. Nawaga made an appointment for us to see Mr. Gilbert Vakalalabure, CEO of Fiji Sports Council, and his attorney, Dr. Jalesi Nakarawa on **June 19th 2023**. They agreed that the projects were worthy of pursuing and began making appointments with the Prime Minister's office and other Ministries that may also be interested.

The months of June and July were very busy meeting with every Minister that had anything to do with Electrical Power or Waste Management in Fiji. Everyone who saw the presentations agreed that we were on the right track and that Fiji needed these technologies.

The company “**Infinite Power Clean Energy (Fiji) PTE LTD**” was registered on June 27th 2023 with the Registrar of Companies and Fiji Revenue and Customs

FORM A5
CERTIFICATE OF REGISTRATION OF COMPANY

REGISTRAR OF COMPANIES
OF
THE REPUBLIC OF FIJI

FORM A5
Section 21
of the Companies Act 2015

CERTIFICATE OF REGISTRATION OF COMPANY

Company No: 2023RC000716

This is to certify that

INFINITE POWER CLEAN ENERGY (FIJI) PTE LTD

is a registered company under the Companies Act 2015.

The company is a **COMPANY LIMITED BY SHARES (PRIVATE COMPANY)**

The members of the company have the liability prescribed under the Companies Act 2015 for this type of Company.

The day of commencement of registration is 27/06/2023

Issued by the Registrar of Companies of the Republic of Fiji on 27/06/2023

Name: **LUSIA BAKANICEVA**

Signature:

NON-INDIVIDUAL REGISTRATION CONFIRMATION

Dear Sir/Madam,

We are pleased to confirm that your Non-Individual Registration Request dated 27/06/2023 to register as a Company has been successful.

Your commencement date of Registration is 27/06/2023 in accordance with the Income Tax Act 2015.

According to the details entered in the Non-Individual Registration Request, you have selected:

Selection	Details
Trading Name	INFINITE POWER CLEAN ENERGY (FIJI) PTE LTD
Business Activity	Electric Power Generation, Transmission And Distribution
Location	32 cawa road , Nadi , Martintar , Ba

You have also selected the following representative for filing your CIT return:

SITIVENI LESEITOGA

As a registered business owner, we ask your help in complying with FRCS legislations available in your information package or through www.frsc.org.fj.

Please make sure that submitted information is correct and avoid delays in filing. Delays and misinformation could lead to penalties.

For further clarification and information, please contact the Customer Service Centre at Nasese Complex, Building 1, Ground Floor or telephone on (+679) 324 3000 or fax (+679) 331 5537 or email info@frcs.org.fj.

Yours Faithfully

Mark Dixon
Chief Executive Officer
Fiji Revenue and Customs Service

A world class revenue service delivering excellence in revenue collection, border protection, trade and travel facilitation

On June 27th 2023 the IPC Team traveled to Vanua Levu to visit the villages and present the Wind Turbine and Waste to Energy Technologies to the Department of Energy and was very well received by everyone there.

On Friday June 23rd 2023 the IPC Team visited the FCCC office to tell them about the Power Projects and to find out what was needed to be done to apply for a generator license to produce and sell electricity in Fiji. The “Generator Licenses” can come after the Power Purchase Agreements (PPA) are signed because it requires the exact addresses and locations where the Turbines will be installed which IPC still does not have.

Subject: Requirement for Generation License

Bula Vinaka Mr. Nawaqa

Greetings from Fiji Competition and Consumer Commission (FCCC)!

As the Electricity Regulator in Fiji, FCCC has processes in place to assess and grant an Electrical License for Generation and Installation for any power generation i.e. using generators, solar, wind or hydro applications we receive, as such please find attached:

1. **Application Checklist,**
2. **License Application Form**
3. **Electricity Regulation 2019 (Schedule 1 specifies the Fees based on the system (kW))** for your perusal.

Please provide all necessary details as stated in the Application Checklist and submit the complete Application form to FCCC for processing the Generation and Installation license. (Soft copy is preferred).

The applicant is required to provide all necessary details as stated in the Application checklist and submit filled copy of License application form via email directly to me.

Please do not hesitate to contact the undersigned should you require any clarification.

Kind Regards

IPC's CEO and Local Director meet with Director of Energy, Mr. Mikaele Belena, to discuss the Power Projects on two separate occasions at his Office. He advised that we move ahead with the Projects.

The IPC Executive Team meet with “Maximize”... A local employment company that will be handling all of the employees for IPC. They take care of Screening, Payroll, Taxes and all things regarding Employees.

On August 17th 2023 Robert and Sitiveni went to meet with the Deputy Prime Minister AGAIN at his office to make sure he knew about our projects and would be supportive of them. We also met with Mr. Lisala Dyer / Head of Regional and Trade Development with Investment Fiji.

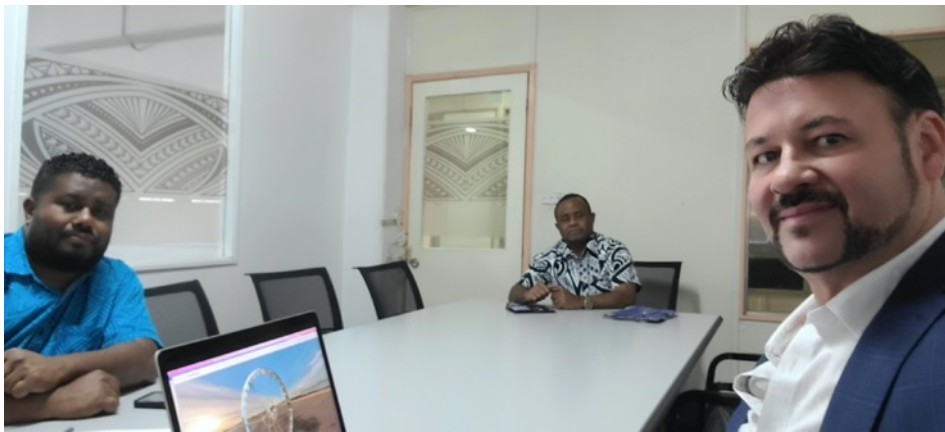

A meeting and presentation was also held on August 8th 2023 with the Minister for Rural and Maritime Development and Disaster Management, Honorable Sakiasi Ditoka and his Board.

Meeting with the IPC Team and the Savu Savu Landowners where the Waste to Energy Plant will be built in Vanua Levu.

Meeting with the Commissioner Eastern, Mr. Vitale Varo regarding IPC's Wind Turbines... Also very well received by him and his staff.

Meeting with IPC's Electrical Engineering Consultant, Mr. Abraham Simpson and our Senior Technical Officer / Electrical. Both of these men worked for EFL for decades designing the EFL Power Grid. Now they work with IPC Energy and will be designing all electrical connections on and off grid.

IPC Energy sponsored its first Rugby Team in Fiji by purchasing their jerseys and printing “Infinite Power Corp” and “Winners Never Quit” on them. IPC has plans to sponsor many more Rugby Teams in Fiji.

IPC meets with the Nabou Landowners where the Waste to Energy Plant will be built in Viti Levu. They have agreed to lease IPC the land and are excited about the project.

IPC meets with the CEO of Vodafone Fiji regarding our Wind Turbines to power their cell phone towers.

IPC also meets with the CEO of Vodafone Vanuatu who also agrees that our Wind Turbines are great for powering their cell phone towers.

IPC Meets with Honorable Linda and gets her full support of IPC's Power Projects.

[Edit](#)

On November 2nd thru the 15th 2023 the IPC Team flew to Cook Islands to present the Waste to Energy and Wind Turbine Technologies to the Government and the local power companies there. IPC was very well received by everyone and they are now ready to move forward.

While in Cook, IPC's Team met with PM Rabuka from Fiji at the Pacific Islands Leaders Conference and attended two separate special events with him and the Fijian people of Cook Islands.

The Cook Islands Prime Minister, Mark Brown, and his Cabinet are now also working with IPC to bring its Technologies to Cook Islands very soon.

After the Press Release announcing that the PPAs were signed with Fisheries and Sports Council, the CEO of ANZ Bank contacted IPC and requested a meeting to see how they could invest in Renewable Energy projects in the South Pacific. Everyone wants to GO GREEN!!!

Infinite Power Clean Energy (Fiji) PTE LTD is very proud of the work that has been done over the last 6 months in Fiji and the South Pacific regarding its Waste to Energy and Ultra-Modern Wind Turbine Technologies that will definitely help all Island Nations that want to go “Renewable” as soon as possible, as well as clean up their local environments and help combat climate change.

IPC Energy and its Board of Directors have left no stone un-turned when it comes to legally setting up the company and also sharing the proposed technologies with everyone that it needed to from the Prime Minister’s office and every other Ministry or office required, including FCCC and EFL, to be able to implement its power projects with no issues.

The Attorney General’s Office and Solicitor General’s Office took nearly 2 months to properly legally vet the Agreement before giving the OK to the Ministry of Fisheries and Forestry to go ahead and sign the PPA with IPC.

If there was anything else that needed to be done or should’ve been done then surely IPC would’ve been told and they would’ve done it without hesitation.

IPC has still not received anything in writing from the Deputy Prime Minister’s Office stating what “Due Process” wasn’t done or what was done wrong to cause him to call a press conference and speak of cancelling the PPAs that were signed to the media, causing much harm to the credibility of IPC as well as the Ministry for Fisheries and Forestry and also Fiji Sports Council.

IPC only wishes to continue with its power projects and be an asset to the nation of Fiji, its government and its people.

We are praying that our projects and PPAs can be restored, including the CEO of Fiji Sports Council, Mr. Gilbert Vakalalabure, who somehow was terminated from his position because of this situation.

Vinaka Vakalevu for taking your time to fully understand the situation at hand and make the right decision to allow the projects and IPC to continue for the good of the people and the nation of Fiji.

Sincerely,

Mr. Robert Beam
Founder/CEO
Infinite Power Clean Energy (Fiji) PTE LTD

PS... What IPC Energy does and what PM Rabuka is talking about are the same. We are in God's Perfect Timing and should continue to fight the good fight with full faith in Infinite Intelligence... Winners NEVER Quit!!

Rabuka urges urgent climate action at COP28

Kreetika Kumar
Multimedia Journalist
kkumar@fbc.com.fj

DECEMBER 4, 2023 6:45 AM

Prime Minister Sitiveni Rabuka has stressed the critical need for the 1.5-degree threshold for the Pacific and the importance of phasing out fossil fuels based on scientific evidence.

During his National Statement address at COP28, Rabuka says there needs to be a sense of urgency in the midst of the ongoing climate crisis.

Rabuka says it is clear that we are at a breaking point for the survival of not only the Pacific but also of humanity.

Prime Minister Sitiveni Rabuka [Source: Fiji Government/Facebook]

ARTICLE CONTINUES AFTER ADVERTISEMENT

He believes that a transformational response is needed.

00:00

00:00

"These include just the transition that ensures global emissions peak before 2025. This will require deep cuts to emissions that align with the target of keeping global average temperatures below 1.5 degrees. Challenges from last week's recorded temperatures in Fiji I do not know whether we are going to achieve that, but I call upon all of us to strive towards that. Otherwise, we'll be under the sea."

Rabuka has urged that the Loss and Damage Fund needs to be more targeted at the special challenges confronting small island developing states because they are the most exposed and vulnerable.

He adds that it's estimated that \$4 trillion will be needed annually by 2030 to manage the impact of climate change.

According to the PM there needs to be an effort to mobilize financing and investment that is accessible and cost-effective in delivering benefits to all.
