## Chapter 2: The Descent

The two trains then began descending and down the hill they went! They were going alarmingly fast, and they both had to apply their brakes! Soon, they were racing down the hill at 100mph!

The train slowed down after that, but the Kimmer Rail's brakes cracked, which meant she couldn't

haul trains on her own anymore. However, they made it over the hill. The trains handed out all the gifts to the good and bad boys and girls on the other side of the hill. The Kimmer Rail was then fixed and everything went back to normal.
