

Agroecology- Project Manager or Technician

Edge Ecosystems

Purposeful Landscaping- Turning Underutilized Spaces into Productive Landscapes

Edge Ecosystems is an ecological restoration and permaculture company. We create functioning systems for the benefit of people, plants, and animals. Example projects are native restoration, rain gardens, food forests, perennial gardens, agroforestry, etc. Edge Ecosystems is a young company offering an opportunity for select individuals to get in on the ground floor of a unique organization.

Edge Ecosystems is seeking to hire people who are passionate about ecological restoration and permaculture and want to do it for a living. We are seeking someone with agronomy experience, working with and implementing agricultural systems using regenerative agriculture and/or permaculture principles. The ideal candidate would be able to bid on, design, and implement the projects.

Details

- Bid on and sell permaculture and agricultural designs and installs
- Design and install ecologically sound systems
- Implement and manage the systems for long-term success
- Willingness to work on native restoration projects as well
- 401(k) and profit sharing
- \$25-\$31hr
- 30-50 hrs/week
- Growth opportunities with small company

Preferred Qualifications

- Demonstratable knowledge of plants, agriculture, livestock, etc.
- Valid driver's license
- Willingness to use herbicides
- Ability to work independently and as a part of the team
