

((5G)) Winnipeg Awareness!

Teach-in for the 6th Global 5G Protest Day We want to BRAG about Winnipeg's wireless radiation QUIET ZONES

MEDIA ADVISORY

WINNIPEG, June 19, 2021— Winnipeg has something to BRAG about. Wireless radiation QUIET ZONES have been identified in each of the 15 Winnipeg wards by citizen scientists. We want to keep them that way. These QUIET ZONES are facing an imminent threat because of the planned installations of so-called small cell network antennas on lamp posts, utility poles and other “non-tower” structures. At least 3,400 and perhaps more than 7,000 antennas are planned throughout Winnipeg. <https://engage.winnipeg.ca/smallcelltechnology>

These antennas will emit 2G, 3G and 4G waves which scientists and medical doctors are warning can cause various adverse effects such as headaches, sleep disturbances and cancer. <https://emfscientist.org/>

Many antennas will have 5G technologies with millimetre waves that have had no long-term safety testing. <http://www.5gappeal.eu/>

Fibre to the premises (FTTP) and other wired connections are safe, reliable, more secure, more cost efficient and have a much lower carbon footprint than wireless connections.

<https://electromagnetichealth.org/wp-content/uploads/2018/02/ReInventing-Wires-1-25-18.pdf>

More than 20,600 Canadians have asked the Government of Canada to suspend 5G rollout and choose safer fibre optic connections instead. <https://www.appel5gappeal.ca/>

Date: Saturday, June 19th, 2021. By invitation. Public health orders will be respected.

Time: 1:00 - 2:00 pm.

Place: City of Winnipeg Hall Courtyard. 510 Main Street.

Speakers:

- Barry Malowanchuk, *Professional Engineer (retired), former Manitoba Hydro Telecommunications Engineer*: **Why we need to be proactive - Health Canada's Safety Code 6 is not protective of human health.**
- Margaret Friesen, *MSc, retired Government of Canada Research Biologist*: **Something Winnipeg can BRAG about. How Winnipeg's wireless radiation levels compare with other sites around the world. Next steps.**

The **BRAG** project is based on the **Global EMF Monitoring, Citizen Scientists** project initiated by Magda Havas Ph.D. retired professor, Trent University. <https://globalemf.net/>

6th Global 5G Protest Day: Groups such as ours are protesting around the world to raise public awareness about the potential health risks associated with 5G wireless technology and to call for a moratorium on the deployment of this technology. More than 300,000 people from 214 nations and territories have signed the “International Appeal to Stop 5G on Earth and in Space”. <https://www.5gspaceappeal.org/the-appeal>
