

No-Cost Mammograms and Pap Tests for Louisiana Women Who Qualify.

Louisiana has one of the highest breast cancer death rates and one of the highest cervical cancer deaths rates in the United States. Both of these are diseases we can stop.

Women aren't getting screened as they should. So if you are low-income or uninsured, contact us. LBCHP has patient navigators to help women get what they need to complete their screenings, including financial help, transportation and more.

What We Offer:

Ages 40-64: Regular mammograms; discuss with your clinician if you are younger than 40 with breast concerns.

Ages 21-64: Regular Pap/HPV tests
