

**Milo Computer Coding Club**, part of Milo Coding Academy, is a nonprofit that works to help Kalamazoo's underrepresented youth explore and learn more about STEM. We teach and host STEM related events and activities for students to develop and learn their STEM skills. We aim to help Kalamazoo's youth explore STEM because we believe that when given the proper guidance and tools, our youth will lead our future as innovators and leaders in the tech industry. Our club provides a pleasant and encouraging atmosphere for youths interested in pursuing STEM in the future.

Our members will play an important role in helping Kalamazoo youth learn more about the digital world and develop important technical skills that will not only help them learn how to code, but properly navigate and succeed in technology.

**Are you learning to Code?** Joining Milo Computer Coding Club (**M3C**) will be a fun and exciting way to learn and practice your coding skills.

Prerequisite:

Must complete MILO Coding Academy's Computer Science Course A or pass an assessment on coding.

Must commit to:

- ✓ Attending monthly club meeting.
- ✓ Taking part in two events yearly.
- ✓ Attending one Coding Members Special Event.
