Workplace Injury Response Services

24-Hour First Aid Response

A highly trained EMT will respond to your jobsite and treat non-life threatening injuries. If needed, workers are sent to a designated health care provider for further treatment.

Drug Testing

DOT and Non-DOT urine collections and private panels - with or without breath alcohol test - using customer's forms and lab or Mobile Care Solutions forms, lab and MRO. Testing for pre-employment, post-accident, reasonable cause, or random selections.

Immediate Results Drug Test

Urine collection and analysis done on site with results available within 15 minutes. 2 testing options: 5 panel or 10 panel

Breath Alcohol Test

DOT or Non-DOT test used to detect the presence of alcohol in the blood (BAC). Testing for pre-employment, post-accident, reasonable cause, or random selections.

COVID-19 Services

COVID-19 Testing (Antigen)

This test is intended for employees who have onset symptoms of COVID-19. The test is used to detect the protein that is found in COVID-19. A technician will administer the test using a nasal swab and have results within 10 minutes. If positive, the test will be sent out to a lab for further analysis.

COVID-19 Testing (PCR)

PCR or polymerase chain reaction test. This is a lab based diagnostic test that determines if you are infected by analyzing a sample taken from your nasal cavity to see if it contains genetic material from the virus. Results within 24 hours!

Professional EPA Approved COVID Disinfection

A skilled technician, wearing full PPE, will fog the infected workplace using EPA approved disinfectants. The fog will sit for a minimum of 15 minutes, while additional emphasis is placed on high traffic touch surfaces.

No Contact Thermometer Screenings

Employees are temperature screened prior to entering the workplace by a technician using a no-contact thermometer. The technician will stay at the workplace for a predetermined amount of time.

Screenings provide an extra layer of protection for your employees.

CPR And First Aid Training

CPR and First Aid instructors and training are accredited through the American Red Cross.

Available classes include: Adult only or Adult/Child/Infant.

Respirator Fit Test

Qualitative Fit Test

Using a hood and bitrex solution, the employee is tested for proper size and fit of the respirator the employee will be using in the workplace.
