

Who We Are

About Us

By serving families and friends impacted by a loved one's substance use, the OASIS Community Center seeks to have a positive, exponential impact on the Lehigh Valley.

The public health crisis of substance use disorder (SUD) results in the social breakdown of individuals and families. Research has shown that people in SUD recovery have a stronger rate of success when their families and friends—their support system—get healthier and receive support themselves.

Additionally, the grief and trauma caused by SUD triggers feelings of guilt and shame for those who have been touched by it. By coming out of the darkness of isolation and into the light of community, we can heal and strengthen the recovery of those with SUD and their families.
