

Who We Are

About Us

After the Miller family tragically lost their son Ben to fentanyl poisoning, they established the OASIS Community Center in 2019 to address the unmet needs of families impacted by a loved one's substance use.

Operated by our nonprofit Speak Up for Ben, Inc., OASIS serves families throughout the greater Lehigh Valley by providing education, supportive programs, and connections to community resources. Research shows that when families receive education and support themselves, their loved ones battling substance use disorder (SUD) have greater recovery outcomes.

The trauma and grief caused by substance use contributes to the social breakdown of families, compounded by feelings of false guilt, shame, and alienation. By coming out of the darkness of isolation and into the light of community, families break the stigma associated with SUD and receive the support they need and deserve for their own recovery.
