TAILOR MADE GLASS

beer and wine | custom design | industrial production at low starting volumes | glass with your story

Thinking out of the box

If you desire to make your brand stand out, and easy to identify, and you are looking for a personal, consistent way to communicate it, think of the simplicity and power of the glass.

**The visual and physical contact with the glass
is one of the closest we can arrange with our customers.**

Your personal glass can be based on any shape of your liking. It can be made as an improved version of your preferred glass design. For example strengthened, or shape adjusted to fit your needs and design preference.

We also work with artists and story tellers, local and international, and can help you to identify the design directions to fit into the matrix of your brand and your story.

Once your design is finished, we apply combination of hand and industrial production methods, to lower the input costs to minimum and benefit from economies of scale.

Volumes starting from 1,000 units
