

The Smart Solution for Crystal Clear Water is All Green

Puronic® has advanced the technology of water treatment with the Clarius™ iGen® whole-house, No-Salt, Bacteriostatic filtration system. Through the implementation of 'Green' technology, Clarius™ iGen® provides high quality treated water without the use of salt, potassium or chemicals. Combined with our SilverShield® HYgene® (incorporating NASA Technology) and the power of the iGen® control valve, this system is so smart that it monitors the system to ensure consistently high quality water, cost-effectively, so you have peace of mind. You will enjoy the benefits, save money and know you are doing your part to protect the environment.

Hair and skin are clean and silky

Food tastes better

Clearly Refreshing® water

Better tasting beverages

Patented iGen® Computerized Control Valve with SilverShield® HYgene® Monitor

- ▶ iGen® intelligent digital microprocessor controls system operations
- ▶ Notifies homeowner when SilverShield® HYgene® Bacteriostatic filter needs to be replaced based on water volume
- ▶ Maintains 60 days of water usage history to maximize backflush/recharge efficiency
- ▶ Built-in diagnostics ensure consistent superior quality water
- ▶ Creates auto reserve so you never run out of quality water
- ▶ Durable, corrosion resistant 1" control valve construction guarantees years of trouble-free, efficient operations

iGen® Digital Control Valve with SilverShield® HYgene® Monitor

Stainless Steel Filter Media Tank

- ▶ Food grade 316L stainless steel provides a sanitary non-permeable surface for processing your water

MicroSilver Bacteriostasis™ Technology

- ▶ Microscopic particles of silver are embedded into SilverShield® HYgene® media to inhibit bacteria growth within the filter media bed

SilverShield® HYgene® Filter

- ▶ SilverShield® HYgene® media reduces objectionable chlorine and chloramine tastes and odors

Filter

- ▶ Purifex® media uses green technology to filter water, making it smooth and gentle while leaving the healthy minerals such as Calcium and Magnesium in your water

Sediment Filter

- ▶ AltaPure® effectively removes suspended solids as small as 5 microns

Clarifier

- ▶ Silica gravel polishes water to a sparkling clarity

NASA Technology at work in your home

- ▶ MicroSilver Bacteriostasis™ Technology is based on NASA silver ion technology developed to purify water on the Space Shuttle Orbiters.
- ▶ SilverShield® HYgene® filter media - incorporates MicroSilver Bacteriostasis™ Technology into activated carbon to inhibit bacteria growth within the system's filter media while reducing objectionable tastes and odors.

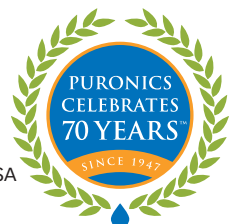

Clarius™ iGen® is not a water softener and does not remove hardness from the water. Contaminants or other substances which can be removed by the Puronics® Clarius™ iGen® system are not necessarily in your water. Operational maintenance and replacement requirements are essential for the product to perform as advertised. Actual savings achieved are dependent on your particular spending habits and usage levels.

Putting Our Experience to Work for You

Puronics® World Headquarters, Livermore, California

A leader in water treatment solutions, Puronics oversees its premier manufacturing operations and supports a national sales and service network from its worldwide headquarters in Livermore, California. Puronics provides customer sales and service through a nationwide network of corporate-owned locations and independent dealers. Our 25,000 square foot manufacturing facility is designed for efficient fabrication and assembly of our water treatment equipment within a stringent quality-controlled environment.

Every day, Puronics is putting knowledge, creativity and innovation to work in solving challenging water problems. We have the broad-based experience in hundreds of thousands of installations – large and small – to foresee all of the countless details, details that make the difference. This experience means things done right, done on time...done without surprises or hidden costs. Whatever your specific application, Puronics has the depth and breadth of capabilities to meet your needs and completely satisfy your expectations. At Puronics we utilize the full array of water purification technologies. Depending upon the specific application, Puronics delivers systems with the right combination of technologies to address your feed water quality, usage and regulatory requirements.

Puronics – the industry benchmark

In 1947 Puronics began its legacy of innovation in the treatment of water throughout the world. Our products are EPA registered.

Technological innovation continues at Puronics, as evidenced by receiving the Frost & Sullivan Award for New Product Innovation.

Quality You Can Count On

Puronics has been awarded the WQA (Water Quality Association) Gold Seal for meeting NSF44 and NSF-372 standards in our quality products.

Our food grade stainless steel tank and advanced control valves ensure years of worry-free performance backed by our limited lifetime warranty.

Caring for Your Water,

Caring for Your Family!

The hidden costs of untreated water.

Municipal water is pumped from rivers, lakes and reservoirs. Municipal water systems filter this water through sand and gravel beds to remove solids then add disinfectants and chemicals to kill bacteria and algae. The water is now considered safe by governmental standards.

This 'safe' water typically contains varying amounts of minerals, solids and chlorine or chloramine. Some of these can cause corrosion to pipes, fixtures and appliances that use water such as hot water tanks and dishwashers, decreasing their efficiency. Cleaning bathrooms, dishes and laundry becomes more difficult and costly. The water can add to the wear and tear on appliances and fixtures and can cause hair and skin to become dry and itchy.

You may also have objectionable tastes and odors in your drinking water, cooked foods and beverages.

The benefits of Puronics softened and filtered water

Puronics water treatment systems with SilverShield® Protection Technology provide the ultimate solution for quality water.

- ▶ Saves time, money and improves the quality of your health
- ▶ Cleaning is faster and easier... no more soap scum
- ▶ Laundered clothing looks brighter and lasts longer
- ▶ Skin and hair are softer and healthier
- ▶ Drinking water tastes and smells better
- ▶ Prepared foods and beverages taste better
- ▶ Appliances perform better and last longer
- ▶ Save money on cleaning products, detergents, skin and hair care products
- ▶ Eliminates the need for bottled water

Innovations in Performance

Goodspring™ BWS - Green Technology

- ▶ Advanced water treatment without the use of salt or chemicals
- ▶ Friendly to the environment

NASA Technology at work in your home

- ▶ MicroSilver Bacteriostasis™ Technology is based on NASA silver ion technology developed to purify water on the Space Shuttle Orbiters.
- ▶ SilverShield® HYgene® filter media - incorporates MicroSilver Bacteriostasis™ Technology into activated carbon to inhibit bacteria growth within the system's filter media while reducing objectionable tastes and odors.

Puronics offers a complete line of whole-house water treatment systems to solve every water problem and fit every budget. Contact your local Puronics representative for a demonstration of the benefits you will enjoy from water treated by Puronics or visit www.puronics.com for more information.

Maximum Conditioning... Maximum Intelligence

The Puronics® FILTRAMAX™ iGen® five-stage whole-house water softener and Bacteriostatic filter system incorporates technology used on NASA's Space Shuttle Orbiters and the most intelligent digital valve to ensure your water is the ultimate quality.

A system so smart, it monitors your water and notifies you when the SilverShield® HYgene® filter needs to be replaced. The ability of the iGen® to adapt to your water usage lifestyle and adjust regeneration and the construction quality of the stainless steel media tank provides reduced operating costs and extended operating life.

Hair and skin are soft and silky

Resuelva sus problemas de agua con la generación de tratamiento de agua más reciente

El sistema combinado de acondicionador y filtro de agua Bacteriostatic Puronics® Hydronex® iGen® B para toda la casa proporciona una calidad de agua superior incorporando los equipos tecnológicos más avanzados disponibles hoy en día. Este sistema económico de alta tecnología utiliza una válvula de control digital refinada para monitorear su consumo de agua y no tenga que hacerlo usted. Le alertará cuando sea el momento de cambiar los medios de filtración, asegurándose de que siempre tenga el agua de máxima calidad. El tanque de medios de filtración de capas múltiples combina una cubierta exterior de acero inoxidable con la durabilidad y la protección de dos capas adicionales de modo que su familia disfrute del agua de máxima calidad durante unos años.

El cabello y la piel son suaves y sedosos

Los alimentos saben mejor

Los platos están más limpios

Bebidas con mejor sabor

PURONICS® Hydronex® iGen® B

Soluciones de agua pura®

Control informatizado patentado iGen® con monitor SilverShield® HYgene®

- Operaciones de sistemas de controles de microprocesador digital inteligentes iGen®
- Notifica al propietario el momento en que es necesario reemplazar el filtro bacterioestático SilverShield® HYgene® según el volumen de agua
- Mantiene 60 días de historial de uso de agua para maximizar la eficiencia de reflujo/recarga
- Retrolavado doble que asegura un lecho de medios de filtración limpios
- Diagnóstico integrado que asegura una calidad de agua superior uniforme
- Crea una reserva automática de modo que no se quede nunca sin agua de calidad
- Válvula de control duradera de 1" resistente a la corrosión que garantiza años de operación eficiente sin problemas
- Sistema de salmuera de flujo descendente que asegura un consumo de agua mínimo y una dosis de sal eficiente

Válvula de control digital iGen®

Tanque de medios de filtración de tres piezas

- Capa interna de polietileno
- Capa externa de fibra de vidrio
- Cubierta exterior de acero inoxidable

Tecnología MicroSilver Bacteriostasis™

- Hay partículas microscópicas de plata incrustadas en los medios de filtración SilverShield® HYgene® para inhibir el crecimiento de bacterias dentro del lecho de medios de filtración

Refinador

- Los medios de filtración SilverShield® HYgene® reducen los sabores y olores objetables de cloro y cloramina

Acondicionador

- Resina mono esférica de alta capacidad S-759 que tiene cuentas de tamaño uniforme que aumentan los caudales y las eficiencias
- Reduce el hierro, la turbidez y la dureza

Clarificador

- La grava de sílice abrillanta el agua hasta lograr una gran clar

Este sistema está diseñado para usar con aguas municipales o aguas de pozos privados cloradas. Cualquier aplicación de pozo privado no clorado debe usar la versión de pozos de este sistema sin HYgene®.

Su distribuidor independiente autorizado:

Tecnología NASA en acción en su hogar

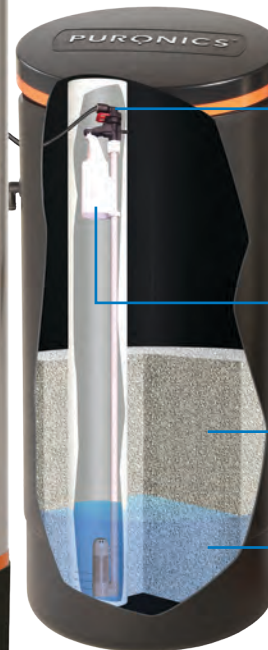

- La tecnología MicroSilver Bacteriostasis™ se basa en tecnología de iones de plata de la NASA desarrollada para purificar agua en los orbitadores de los transbordadores espaciales.
- Los medios de filtración SilverShield® HYgene® incorporan la tecnología MicroSilver Bacteriostasis™ en carbón activado para inhibir el crecimiento de bacterias dentro de los medios de filtración del sistema mientras se reducen los sabores y olores objetables.

Los sistemas Hydronex® iGen® C están certificados por WQA según NSF/ANSI 44 para la reducción de minerales duros, bario y radio 226/228, y NSF/ANSI 372 para cumplir con las normas de ausencia de plomo, según se verifique y sustancie por medio de datos de prueba.

Abarca los modelos MP820B, MP1030B y MP1240B
Reducción efectiva de estroncio según se verifique mediante datos de pruebas independientes.

Solve Your Water Problems with the Newest Generation of Water Treatment

The Puronics® Hydronex® iGen® B whole-house Bacteriostatic water softener and filter combo system provides superior quality water by incorporating the most technologically advanced equipment available today. This cost-effective, hi-tech system utilizes a sophisticated digital control valve to monitor your water usage so you don't have to. You will be alerted when it is time to change the filter media, ensuring you always have the highest quality water. The multi-layered filter media tank combines an outer cover of stainless steel with the durability and protection of two additional layers so your family will enjoy the highest quality water for years.

Iron in your water making you see red? We have the smart solution to your problem.

Is the iron in your water causing ugly red stains that ruin clothing, appliances and fixtures? Is it giving your water an objectionable odor and unpleasant taste? The Puronics Ironmax™ iGen®, a whole-house water filtration system, is custom designed to solve this problem. The innovative air injection system maximizes iron, manganese and sulfide removal without the use of chemicals. The Ironmax™ is 'green' technology that is ideal for well water. The iGen® control valve is the brains of the system, tracking water usage, flow rate, and regeneration to ensure the cost-effective consistent production of high quality water. Your family will enjoy the benefits of reliable performance without the problems iron can cause.

Iron Removal

Patented iGen® Computerized Control Valve

- ▶ iGen® intelligent digital microprocessor controls system operations
- ▶ Maintains water usage history to maximize backflush efficiency
- ▶ Tracks water usage and flow rates
- ▶ Easy to operate
- ▶ Durable, corrosion resistant 1" control valve construction guarantees years of trouble-free efficient operations

iGen® Digital Control Valve

Iron, Manganese and Sulfide Removal

Iron in your water causes ugly red stains which can ruin appliances, clothing and fixtures. The Ironmax™ system utilizes oxidation and filtration to effectively remove iron, manganese and sulfides.

- ▶ Ideal for well water
- ▶ Prevents staining
- ▶ Reduces unpleasant odors
- ▶ Produces great tasting water

Air Injected Oxidation - No Chemicals

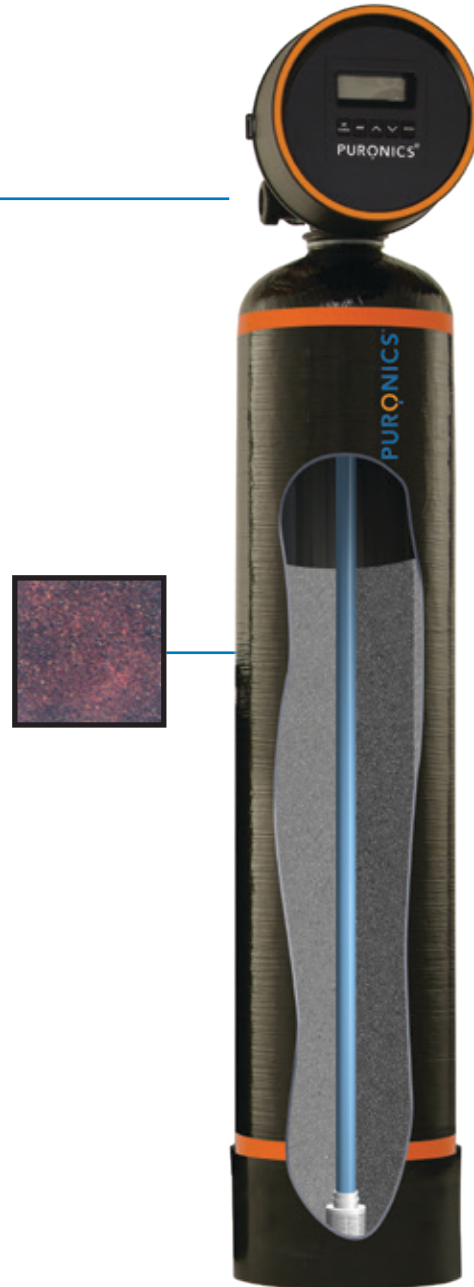

The manganese greensand media bed is exposed to oxygen from outside air injected into the unit during regeneration activating the oxidizing capacity of the greensand. Iron, manganese and sulfides are oxidized into precipitates without the use of chemicals.

Filtration

Iron, manganese and sulfide precipitates are filtered and removed from the water by backflushing and regeneration of the media bed.

PURONICS® Micromax™ 8500

Pure Water Solutions®

Do you know what is in your drinking water? Get Peace of Mind with the Ultimate Solution.

The Puronics® Micromax™ 8500 drinking water system is designed with advanced filtration technology for the ultimate protection and great tasting crystal clear water. This 5-stage system effectively reduces the majority of contaminants such as pharmaceuticals, PFAS (potentially toxic chemicals), chlorine, dissolved metals, lead, waterborne cysts, and others that may be present in your water supply. The simple design fits easily under any kitchen sink. The Micromax™ 8500 will assure your family will benefit from the reduced risks associated with emerging manmade and other contaminants that may be in water supplies.

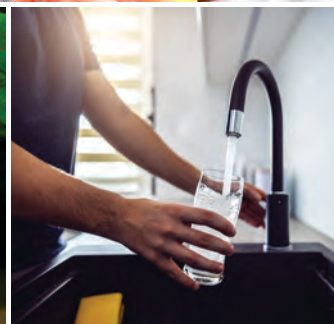

Food and beverages taste better

Quality water for baby formula

Care for plants and aquariums

Reduces Pharmaceuticals that could be in tap water

PURONICS® Micromax™ 8500

Pure Water Solutions®

Ultimate quality and performance

- ▶ Patented Easy Change™ sanitary filter cartridges automatically shut off water when removed for quick, no-leak filter replacement
- ▶ Operates on household water pressure and uses no electricity
- ▶ Stylish slim-profile design requires minimal use of space
- ▶ Kitchen Faucet Adapter allows easy connection to cold water supply - no need for needle valves or special plumbing
- ▶ Designer long-neck faucet blends into any kitchen décor
- ▶ Each system is subject to rigid quality control and testing, the results of which are proudly included in packaging
- ▶ Durable high-quality fittings, valves and construction ensure years of reliable, leak-free performance

Five stage drinking water solution

Stage 1 - Sediment Filter

- ▶ Protects the entire system by removing dirt, rust and sediments as small as 2/10,000 of an inch

Stage 2 - Activated Carbon Filter

- ▶ High-capacity 5-micron graded density porous carbon filter
- ▶ Effectively reduces PFAS chemicals
- ▶ Maximum contact time with filter media for de-chlorination with effective adsorption

Stage 3 - Ultra-filtration (UF)

- ▶ Super-fine filter creates a barrier to waterborne cysts like Cryptosporidium and Giardia, if present
- ▶ Self-cleaning process
- ▶ Reduces particulate matter as small as 1/10,000 of a micron

Stage 4 - Reverse Osmosis (RO)

- ▶ Unique filter allows water molecules to slowly pass through
- ▶ Reduces the majority of dissolved solids such as Sodium, Selenium, Arsenic, Nitrates and Nitrites, if present
- ▶ Reduces dissolved metals like Lead, Copper, Cadmium, Hexavalent and Trivalent Chromium, if present
- ▶ Impurities are automatically flushed down the drain
- ▶ Processed water is stored in a sealed and sterilized tank
- ▶ Reduces dissolved pharmaceuticals and biologicals

Stage 5 - Activated Carbon Block Adsorption

- ▶ High density carbon block polishes water from storage tank
- ▶ Removes unpleasant tastes and odors
- ▶ Produces great tasting crystal clear water

A quick twist shuts off the water and removes the cartridge - no leaks, no mess.

System Tested and Certified by the Water Quality Association (WQA) against NSF/ANSI Standard 58 for the reduction of Arsenic, Barium, Cadmium, Hexavalent Chromium, Trivalent Chromium, Copper, Fluoride, Lead, Radium 226/228, Selenium, Turbidity and Total Dissolved Solids (TDS); against NSF/ANSI Standard 42 for the aesthetic reduction of Chlorine Taste and Odor; against NSF/ANSI Standard 53 for the reduction of VOCs and PFOA/PFOS; against NSF/ANSI Standard 401 for the reduction of Bisphenol A, Estrone, Ibuprofen, Naproxen and Nonylphenol; and NSF/ANSI Standard 372 for low lead compliance.

Out with the bad, In with the good. Healthy water the way Mother Nature intended.

The Pur-Alkaline supplements high quality drinking water with essential minerals to promote a healthier lifestyle. The human body is 70% water, so why not drink water that provides your body with the minerals it needs. Plus it tastes better. The Pur-Alkaline works in conjunction with a reverse osmosis (RO) drinking water system like the Puronics Micromax™ Series, to restore to your water the beneficial minerals that were removed during the reverse osmosis water purification process. So, get more out of your water by putting more in with the Pur-Alkaline.

Supports better health

Improves Performance

Clearly Refreshing™ Water

Better tasting beverages

Alkaline water contains essential minerals:

- ▶ Improves hydration
- ▶ Supplements nutrient levels in your body
- ▶ Balances the PH levels of your water
- ▶ Tastes Great

Improve Your Performance

Serious athletes drink ionized alkaline water to help improve their performance level. Alkaline water helps reduce metabolic acids which can cause muscle fatigue, muscle weakness and hinder continuous exertion. Alkaline water is absorbed by the body more quickly which improves hydration and performance.

Turn Your Tap Water into a High Performance Fountain

Your city tap water typically contains harsh chemicals such as chlorine or chloramine that are used to treat it to meet government safety standards. It may also contain minerals and impurities that your body does not need. Puronics' line of Micromax™ reverse osmosis (RO) drinking water system removes almost all of these harsh chemicals, minerals and impurities. But, beneficial minerals are also removed during this process. The Pur-Alkaline revitalizes your drinking water with the essential minerals that promote a more healthy body.

No Need for Bottled Water

Do you really know the quality of the bottled water you might drink? With the Pur-Alkaline you can be sure the ionized alkaline water you are drinking is of the highest quality and provides the benefits of the essential minerals your body needs... *and it tastes Great!*

The proper performance of this system requires a water source that has been treated by a properly maintained reverse osmosis drinking water system.

Your Authorized Independent Dealer:

Contaminants or other substances which can be removed by the Puronics® Pur-Alkaline system are not necessarily in your water. Terminate Your Water Problems with the Newest Generation of Water Treatment.

The Puronics® Terminator® iGen® series whole-house water softener and Bacteriostatic filter system incorporates the most technologically advanced equipment available today. A system so sophisticated, it does the thinking about the quality of your water all day and all night so you don't have to. The digital control valve calculates the amount of water being treated and notifies you when it's time to replace the Puronics® Silvershield® HYgene® filter. The iGen® also gives you control of your water with three regeneration options to maximize the water quality in your home. Backed by over 70 years of technology, performance and reliability, the Puronics® Terminator® iGen® will filter and soften your water for years to come.
