
COVID-19 SAFETY PROTOCOL

Please take special note of the additional safety measure in place and ensure you are adhering to them.

1. Parents/caregiver/family members MUST wear a mask when interacting with therapists.
2. Therapist MUST wear masks for the entire session.
3. Therapists will need to complete a daily COVID-19 screening prior to their session and sending the results to myself via a screenshot or link. <https://covid-19.ontario.ca/self-assessment/>
4. Additionally, parents will be required to also complete a daily COVID-19 screening in this link <https://covid-19.ontario.ca/school-screening/> and send a screen shot to the therapist directly or myself prior to the session. Sessions will NOT occur unless the screening has been completed and their child is cleared to attend (school or daycare). If therapist have not received a message from the parent with the screen shot prior to the session, the therapist will please message you and ask you to complete it prior to your session, (it only takes a few seconds).

Therapists are required to take the first and last 5 mins of each session to sanitize and disinfect all programming materials and furniture.

Please let me know if you have any questions or concerns. I trust that I can count on your full cooperation as we all get through this together.

Stay healthy and Safe!!!!
