

## Furniture Paint – RethunKation Instructions

No need to prime – no need to sand – no special brushes or supplies needed –  
extremely durable finish!

### Step 1 The Prep

No sanding or priming necessary. Using a clean soft cloth, wipe The Prep on all surfaces to be painted. This removes oils, waxes and dirt and “Preps” the surface for best adhesion of paint.

### Step 2 The Paint

Apply Furniture Paint with a quality bristle brush. Apply your first coat making sure there are no drips. This is a bonding coat and may appear thin – that’s normal and good. When dry to the touch, additional coats may be applied. Using a fan speeds up dry time. In most cases two coats is sufficient to cover well.

### Step 3 Personalize

When Furniture Paint is dry to the touch you can distress. We use an electric hand sander and 80grit sandpaper. Distress all the areas that would normally age with time. Remember that it’s only paint and you can repaint – so have fun! Random is good. The distressing will highlight any cool architecture on the piece and gives it some fabulous personality!

*At this point you can be finished & proud of your masterpiece – or use some of our otherfabulous products...*

- Dark Glaze** – Tinted and ready to go – a neutral color that looks good over all our paintcolors!
- Tintable Glaze** – Add any of our paint colors to this product to make a custom glaze! Possibilities are endless!
- Stain Top** – Get a “stained” look without any sanding. Comes in three colors that can be easily layered to create a gorgeous farmhouse look!
- Tuff Top** – Our commercial grade, satin finish sealer for the top of dining room tables and other pieces that will get high use.
- Flat Top** – Our commercial grade matte finish sealer – not recommended for use over darker colors.
- Rethunk Gunk** – Our decoupage product. Use this to add fabric or paper accents to your pieces. Dries fast and clear

# #BreakTheChalkHabit

What can "Breaking The Chalk Habit" do for you?  
Chalk Paint lines have been around for years. Their ability to be used without sanding or priming started a renewed interest in saving & updating furniture.

Here at **Rethunk Junk by Laura** we have taken things to a fabulous new level. Unlike Chalk paints, our patent pending paint line uses no powder additives, and our **Drykwik Technology™** will absolutely blow you away.

This revolutionary formula makes painting furniture and cabinets easier, faster and less expensive than you ever imagined!  
It's amazing what we can (re)do together when you  
**#BreakTheChalkHabit**

## 5 Steps to getting it done:

- 1 Prep.- Clean your piece with our Prep.
- 2 Paint!.- Yep! - already! no sanding or priming necessary!
- 3 Distress.- Take a sander to that puppy and knock off some paint!
- 4 Glaze.- (optional) you can use our Dark Glaze or add paint to our Tintable Glaze to create a custom color.
- 5 Seal.- For table tops and high use surfaces we recommend sealing with our Tuff Top.

**You're done !**  
Enjoy your piece and brag to all your friends !
