# Intellectual *Assessment*

## IQ TESTING FOR SCHOOL PLACEMENT

*We offer Intellectual (IQ) testing to assist with schools.*

## IQ Testing

We offer Intellectual (IQ) testing to assist your child with school placement. Certain schools require the assessment of intelligence as part of the school application.

The IQ results are not used to determine a learning disability, ADHD, or other clinical concern.

The results of the IQ assessment will be reviewed only to verify that the assessment is valid and will not be reviewed for any diagnostic or other similar purpose.

For clinical assessments, the IQ testing is only part of a comprehensive assessment, and not viewed as a stand-alone measure for decision making.

The IQ assessment measures:

- Full-Scale IQ
- Verbal Comprehension
- Fluid Reasoning
- Visual-Spatial Skills
- Working Memory
- Processing Speed

## Wechsler Intelligence Scales

The Wechsler Intelligence Scales (e.g., WPPSI-IV, WISC-V, WAIS-IV) are individually administered intelligence test for children and adults. They generate a Full Scale IQ score, which represents a child's general intellectual ability. The tests also provide five primary index scores (i.e., Verbal Comprehension, Visual Spatial, Fluid Reasoning, Working Memory, and Processing Speed) that represent a child's abilities in more discrete cognitive domains. Composite scores can be derived from various combinations of primary or secondary subtests.

# Consent for IQ Assessment

I understand that my child will be seen for an IQ Intelligence test. The evaluation will include an interview, record review, and IQ testing. Various cognitive domains are measured with IQ testing, including verbal comprehension, fluid reasoning, visual spatial skills, working memory, and processing speed. However, not all skills are assessed, such as artistic ability and musical skills. I may request further information about any of these procedures.

This evaluation is scheduled for several hours, and breaks are provided as needed. Your child may finish the evaluation on another day if needed to give his or her best performance. I understand that the purpose of this evaluation is to provide information to your child's school or potential school, or to other professionals who have requested the evaluation in order to assist in their planning.

The material from the testing may result in the generation of a report that will provide information related to assessment results. The report generated by Dr. Ambler will be sent to the parent/guardian, unless a special authorization form has been completed. If desired, Dr. Ambler will also discuss the results with me, and any others which I so designate, by signing a release of information allowing Dr. Ambler to do so.

Testing can cause anxiety or emotional discomfort in some individuals. I recognized that Dr. Ambler has no intention of causing any personal discomfort, but that he is simply carrying out his professional task associated with this evaluation. Your child is free to refuse to answer any question he or she chooses, and you are free to terminate the evaluation whenever you wish. Dr. Ambler is required to notify authorities if he knows of or suspects child/elder abuse or neglect, or if he has reason to believe that, the patient may harm others or himself/herself.

Christian C  
Ambler PhD

Neuropsychologist  
Licensed Psychologist

Dr. Ambler's interests include learning disability, ADHD, mental health, autism, and neuropsychological sequelae of medical disorders.

Dr. Ambler sees patients at NEAT and Stanford Children's Hospital.

*The results from the IQ assessment are used for educational purposes only, and not for diagnostic or clinical needs..*

*The terms of this evaluation had been reviewed, understood, and agreed to by me.*
