GIVE US THE DIRT

Composting Project Intake Worksheet

2 OF 3 | FACILITY & FEEDSTOCKS

Give us the dirt on your operation

Estimates are welcome. We can refine volumes and design criteria together.

Facility / project name

Facility type

Facility address / location

Peak monthly inbound material *

Unit of measure *

Include bulking agent in the peak monthly quantity.

Composition of inbound material *

Example: 50% green waste, 50% food waste. Include biosolids, manure, wood, digestate or other feedstocks.

Current composting process / equipment

Describe ASP, windrows, in-vessel systems, aeration controls, covers, turners or other equipment now in use.

Primary odor sources, locations and operating concerns

Examples: receiving, active piles, turning, curing, processing building, perimeter, seasonal events or complaints.

ATTACHMENTS ARE HELPFUL

Site plans, photos, odor studies, air permits and material analyses can help us recommend the right approach.
