

Non-surgical Decompression

Stabilise. Restore. Move again.

What Is The KNEE ON TRAC?

The KNEE ON TRAC system is a non-invasive knee pain therapy that offers a revolutionary solution for those that live with chronic knee pain.

The KNEE ON TRAC isolates the knee and offers safe and effective mechanical traction to decrease pain by :

- ✓ Decreasing Inflammation
- ✓ Increasing Range of Motion
- ✓ Allowing Re-Hydration
- ✓ Speeding up the Healing Process

What It May Help With

- Chronic Knee Pain
- Osteoarthritis
- Meniscus Tears
- ACL Injuries
- Failed Surgery
- Previous Injury
- Sub-Acute Muscle Strain
- Chronic Muscle Strain

Mechanical Traction

Studies show that mechanical traction was more effective in decreasing pain and improving quality of life than using conventional methods alone. These studies also investigated the reduction of symptoms after mechanical traction along with conventional therapy. The results were shown to have significant improvement.
