Landout Checklist

S - Size
S - Slope
S - Stock
L - Lines
O - Obstacles
W - Wind

Pre Flight Checklist

Appropriate clothing
Charged cell phone
Backup battery
Water & food
Relief system
Tie down kit
Land out kit
Retrieve buddy
Patience

Airport	Runways	Elevation (MSL)	Frequency
022 McKinley	160 / 340	1420'	123.05
007 Weatherford	170 / 350	1605'	122.8
024 Thomas	170 / 350	1732'	122.9
010 Clinton Regional	170 / 350	1615'	122.8
008 Cordiel Muni	170 / 350 & 040 / 220	1589'	122.9

Your flight is automatically scored by emailing your .igc trace to:
OSA@soaringtasks.com

A summary of completed tasks is immediately emailed back.

The fastest flights are recorded on slips, magnetized to the task boards, and ordered from fastest to slowest - top to bottom. Adjust the slips to maintain this ranking as required. Complete a slip with this information:

Pilot Name(s)	A/C & Reg	Date	Ranking Metric
---------------	-----------	------	----------------

For a new, faster flown task once the board is full, wipe the slowest slip clear to make it available. Complete it, and place it back on the task board in order - fastest on the top.

If the task fails the test by email, but is proven good on SeeYou, an OO can sign the slip with a validated time. Please share constructive feedback, or your experience with the platform through soaringtasks.com.

To retrieve a file including turnpoints and tasks for the club's Proving Ground, send an email to the address above with the word "task" anywhere in the subject. The club Proving Ground .cup file will be promptly delivered as an attachment to the requesting email address.
