

CAPABILITY STATEMENT

Clean Properties Engineering, Inc. is an environmental engineering services company established in 1989.

We offer scientific engineering solutions for hazardous waste site and wastewater treatment and disposal. We work on **assessment and remediation of hazardous waste sites, design-build for wastewater treatment projects, stormwater O&M and more.**

CORE COMPETENCIES

- ✓ Groundwater and Soil Remediation
- ✓ Environmental Management for Construction
- ✓ Environmental Site Assessment
- ✓ Wastewater Treatment
- ✓ Stormwater System Inspection
- ✓ Localized Flood Studies
- ✓ Septic System Troubleshoot and Repair
- ✓ Air and Soil Gas Testing with Portable GC
- ✓ Wastewater Treatment Facility Planning Studies
- ✓ Emerging Contaminant Fate and Transport Studies in Rivers and Groundwater
- ✓ R & D in Water Treatment, Sensors & Geothermal

DIFFERENTIATORS

- Resident engineering-water & wastewater pipe/facility
- Completed thousands of hazardous waste site projects
- Experienced working with and for MA and US environmental regulatory agencies
- Septic system design-build capabilities & scientific rehab
- Oxygenation science for wastewater treatment efficiency
- Mid-sized excavator for environmental projects
- Expert in Environmental Microbiology, bioremediation
- Portable GC measures air toxins; vapor intrusion design
- Subsurface Construction, foundation underpinning
- Used vacuum excavation on 100's of projects
- Performed many multi-location projects for municipalities, telecommunications, hospitals, universities

RECENT PROJECTS

- **Stormwater Inspections:** Arsenal Shopping Mall
- **Environmental Site Assessment:** Multiple building sites for group home developments
- **Groundwater Remediation:** Former gas station Design-Build
- **Waste Management:** Adams WWTF Demo Tanks, Pumps, Switches
- **Soil Remediation:** Junk Yard PCBs & Lead
- **Study of Fate and Transport of PFAS** in the Sudbury River
- **High Groundwater Studies** for Construction Projects
- **Service Utility Lines:** Design-Build with City Tie-Ins
- **Resident Engineering:** Municipal Water Line Installation
- **Site Plan Approval:** Multi-Residential Townhouse Development
