

## Proline Pricing Guide

At Proline Auto Detailing, we believe that pricing should reflect not only the time and labor invested in your vehicle, but also the level of care, quality, and expertise we bring to each service. Our pricing is carefully determined based on several key factors that ensure your vehicle receives the highest standard of detailing available:

---

### Premium, pH-Balanced Products

We exclusively use pH-neutral soaps and degreasers that are safe for all surfaces, including ceramic coatings, clear coats, chrome, and rubber trim. These products prevent chemical etching and surface degradation, ensuring your vehicle's finish remains protected during and after each service.

---

### Custom-Mixed Solutions Based on Vehicle Needs

Unlike generic wash operations, we custom mix professional-grade chemicals on-site depending on the specific condition and material of each vehicle. Whether dealing with stubborn brake dust, oxidized paint, or embedded contaminants, our team selects the right tools for the job, not a one-size-fits-all solution.

---

### Detail Without Defects

Our goal is not just to make your vehicle look clean—it's to do it the proper way. That means avoiding the creation of new imperfections such as:

- Swirl marks
- Spider webbing
- Micro-scratches

We use high-quality microfiber towels, soft brushes, and two-bucket wash methods to preserve your paintwork rather than damage it during the process. We don't cut corners, and we don't rush.

---

### Time, Training & Equipment

Proper detailing takes time. A high-level service requires:

- Professional-grade tools and techniques
- Trained and experienced technicians
- Attention to the smallest details

Whether we're performing a full Restorative Detail or an Ultimate Wash, your vehicle is treated with the same precision we would expect for our own.

---

### In Closing

Our prices are a reflection of what goes into doing the job right—not just to make your car shine today, but to protect and enhance its value over time.

We appreciate your trust in us and look forward to continuing to exceed your expectations.

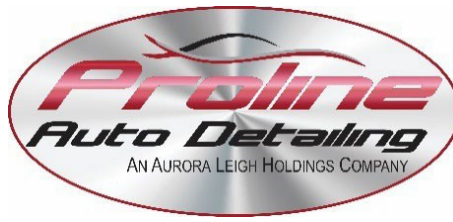

Best regards,
