

Proline Auto Detailing, LLC – The Proline Way

The Proline Way is a meticulous and safety-focused vehicle wash and detailing service designed to preserve and enhance the appearance of every vehicle. Our approach prioritizes the careful removal of dirt, debris, contaminants, bugs, tar, sap, and other substances from both the exterior and interior, using techniques and products that protect delicate surfaces.

Exterior Wash Process:

We begin with a thorough high-pressure rinse to remove surface dirt and contaminants, followed by a pre-treatment when necessary. We use pH-balanced soaps tailored to the vehicle's finish and condition. This is applied using a high-pressure foam cannon, maximizing suds for optimal lubrication. Our feather wash mitts are then used to agitate the surface, removing stubborn debris without damaging the paint. To complete the wash, we employ a high-pressure, heated air cannon, significantly reducing drying time and avoiding the need for abrasive methods like towels or microfiber cloths.

Advanced Paint & Exterior Care:

Once the exterior is clean, we assess the paint's condition and recommend any necessary treatments, such as Clay Bar, Iron Removal, Bug & Tar Removal, or Paint Correction. These treatments are performed only after discussing the findings with the customer, ensuring that the vehicle's clear coat and paint are restored to the highest level of clarity, depth, and shine.

Interior Cleaning:

Our interior cleaning process mirrors the attention to detail of our exterior work. After a thorough cleaning, we analyze the interior condition and use pH-neutral products to protect delicate surfaces like plastics, rubber, leather, and electronics. This ensures an optimal level of cleanliness while safeguarding the vehicle's interior components.

The Proline Advantage:

The Proline Way extends beyond just a clean vehicle. We carefully manage every aspect of the cleaning process, prioritizing the customer's expectations. Our goal is for clients to choose Proline not only for the immaculate results but also for the confidence that their vehicle is being treated with the utmost care and professionalism, backed by years of industry experience.
