Re: Proline Auto Detailing – Business Summary

Proline Auto Detailing, LLC (“Proline”) was initially founded in the Summer of 2002 by Mr. Allsup while attending college at Kennesaw State University. The company initially started as a sole proprietorship located in Kennesaw, GA operating primarily in the mobile detailing market. After graduating college in 2004 and completing his MBA in 2007, Mr. Allsup continued his pursuits within the industry as a hobby and enthusiast.

Due to significant demand and opportunistic timing, Proline was formally incorporated as a wholly owned subsidiary of Aurora Leigh Holdings, LLC in June 2019. The Company was formed to meet the growing demand for detailing and other specialty products and services for substantially all over-the-road vehicles. Proline offers a variety of detailing and restorative services with prices ranging from \$100 to \$3,500. In addition to detailing and restorative services, Proline offers a full line of specialty automotive services including, but not limited to, mold and mildew removal ceramic coatings, paint correction, trailer and RV cleaning, and other specialized customization requests. Specialty services comprise the majority of work performed by the company.

Proline is an authorized dealer and installer for Ceramic Pro, the leading manufacturer of nanoceramic technology. Proline also offers mobile detailing services across Metro Atlanta. Our current service area extends down through McDonough, GA and up through Cartersville, GA. We have 2 full-size trucks and trailers dedicated towards serving the mobile detailing market.
