SUNWIN

Industry coverage & collaboration possibilities

DATAFIR3 is an end-to-end solution (E2ES) provider hub with the right knowledge bank, technical and a network expertise to meet your business & DX needs no matter what industry or sector you are in.

Smart City

Use advanced technologies to make cities safer, more livable, and sustainable

Campus

Empower your industrial park with innovative AI, IoT, big data, and cloud computing

Financial Services

Get the agility while keeping your FSI safe, stable, and secure

Manufacturing

Increase production, perform preventive maintenance, and accurately predict customer demands

Telecom

Empower carriers to monetize networks, innovate services, and improve operation efficiency

E-Commerce

Build and host your e-commerce websites on our highly scalable and available cloud infrastructure

Gaming

Build, launch, and scale games faster on the cloud

Media & Entertainment

Produce premium content, distribute it globally, and improve audience engagement

Automotive

Cut operational costs, improve quality and efficiency, and enhance sales support

Education

Boost your talent cultivation, smart campus, and online learning

Healthcare and Life Sciences

Accelerate research, scale telemedicine services, and improve health outcomes

Retail

Provide a smarter, more personalized shopping experience and take multichannel selling to the next level

The background is a light gray with a subtle, repeating pattern of small, dark, irregular shapes. Overlaid on this are several large, dark, irregular shapes that resemble celestial bodies or nebulae. Some of these shapes have thin, curved lines trailing behind them, suggesting motion or orbits. In the center, the text 'Products & Services' is displayed in a bold, dark gray font. A small, stylized flame icon is positioned above the ampersand. In the bottom left corner, there is a small, faint text element that reads 'click to continue...'.

Cloud services

Huawei Cloud drives competitiveness on its offerings and services with a cloud-native mindset. The competitiveness is found in the form of ubiquitous cloud-native service (UCS), AI services with a one-stop AI development platform, big data cloud services, media services, and cloud stacks that leverages scenario-based solutions for industries. DATAFIR3 notes that the emergence of cloud adoption and opportunities in Indonesia is aligned with Huawei Cloud's long-term commitment and competitiveness in ASEAN.

As one of the key value propositions and aims for competitiveness, industry-based solutions and expertise have been introduced and emphasized to accommodate digital infrastructure needs and requirements to accommodate industries' DX agenda. Focusing on key industries, such as financial services, media, and logistics, in ASEAN, Huawei Cloud has driven key solutions for each industry to support digital businesses in the ecosystem.

Fintech Solutions

Technology and solutions driven consultancy & software development that lives by the purpose of creating the financial services of tomorrow; helping financial players& enterprises build truly digital products, with faster experiments and in connection to the fintech ecosystem.

Retail POS & Payment terminals

Cyber Security

Managing your organization's cybersecurity completely on your own is a challenge. The more digitized a business becomes, the greater the attack surface. And yet, digitization is what your employees and customers demand.

Cybersecurity-as-a-service (CSaaS) is the outsource option. Some companies prefer an "all-in" approach with one vendor, while others choose to outsource some or most of their enterprise security tasks. Cybersecurity-as-a-service combines best-of-breed security services, software, and human expertise in a single, holistic solution.

Application security—
email security,
credential protection

Endpoint security—
including connected
devices of remote
workers beyond the
firewall

Data security—in
motion and at rest

Network security—
filtering out harmful
traffic, blocking
potential intruders

Cloud security—
including multi-cloud
environments

Managed
Detectionnse (MDR)—
detect and quickly
neutralize threats

SOC Report

G7:E6 with over 80% market share in China is largest and most influential software service provider in the industry, with businesses spanning key vertical markets covering both production and consumer logistics. The Group's customers include major players in the trillion-yuan road freight transport market. With its product portfolio serving as a one-stop digital service that integrates subscriptions and transactions, the merged entity consolidates the two prior firms' advantages in technology, making it the only technology company in the sector to provide a comprehensive range of Internet of Things (IoT) software as a service (SaaS) services.

ModelArts HOT

Build, train, and deploy machine learning models quickly and easily

Huawei HiLens (HiLens)

Use this platform for multimodal AI development

Graph Engine Service (GES)

Query and analyze graph-structure data based on relationships

Question Answering Bot (QABot)

Build and manage intelligent Q&A bots

Image Recognition

Identify visual content in images

Content Moderation

Detect inappropriate content in images, text, and videos

Optical Character Recognition (OCR)

Detect and extract text from any image and convert the text into JSON format

Image Search

Help the search of exact/fuzzy match images from the specified gallery

Short Sentence Recognition

Convert short audio files (up to a minute long) into text

EIHealth

Use AI to facilitate genomics, drug discovery, and medical imaging

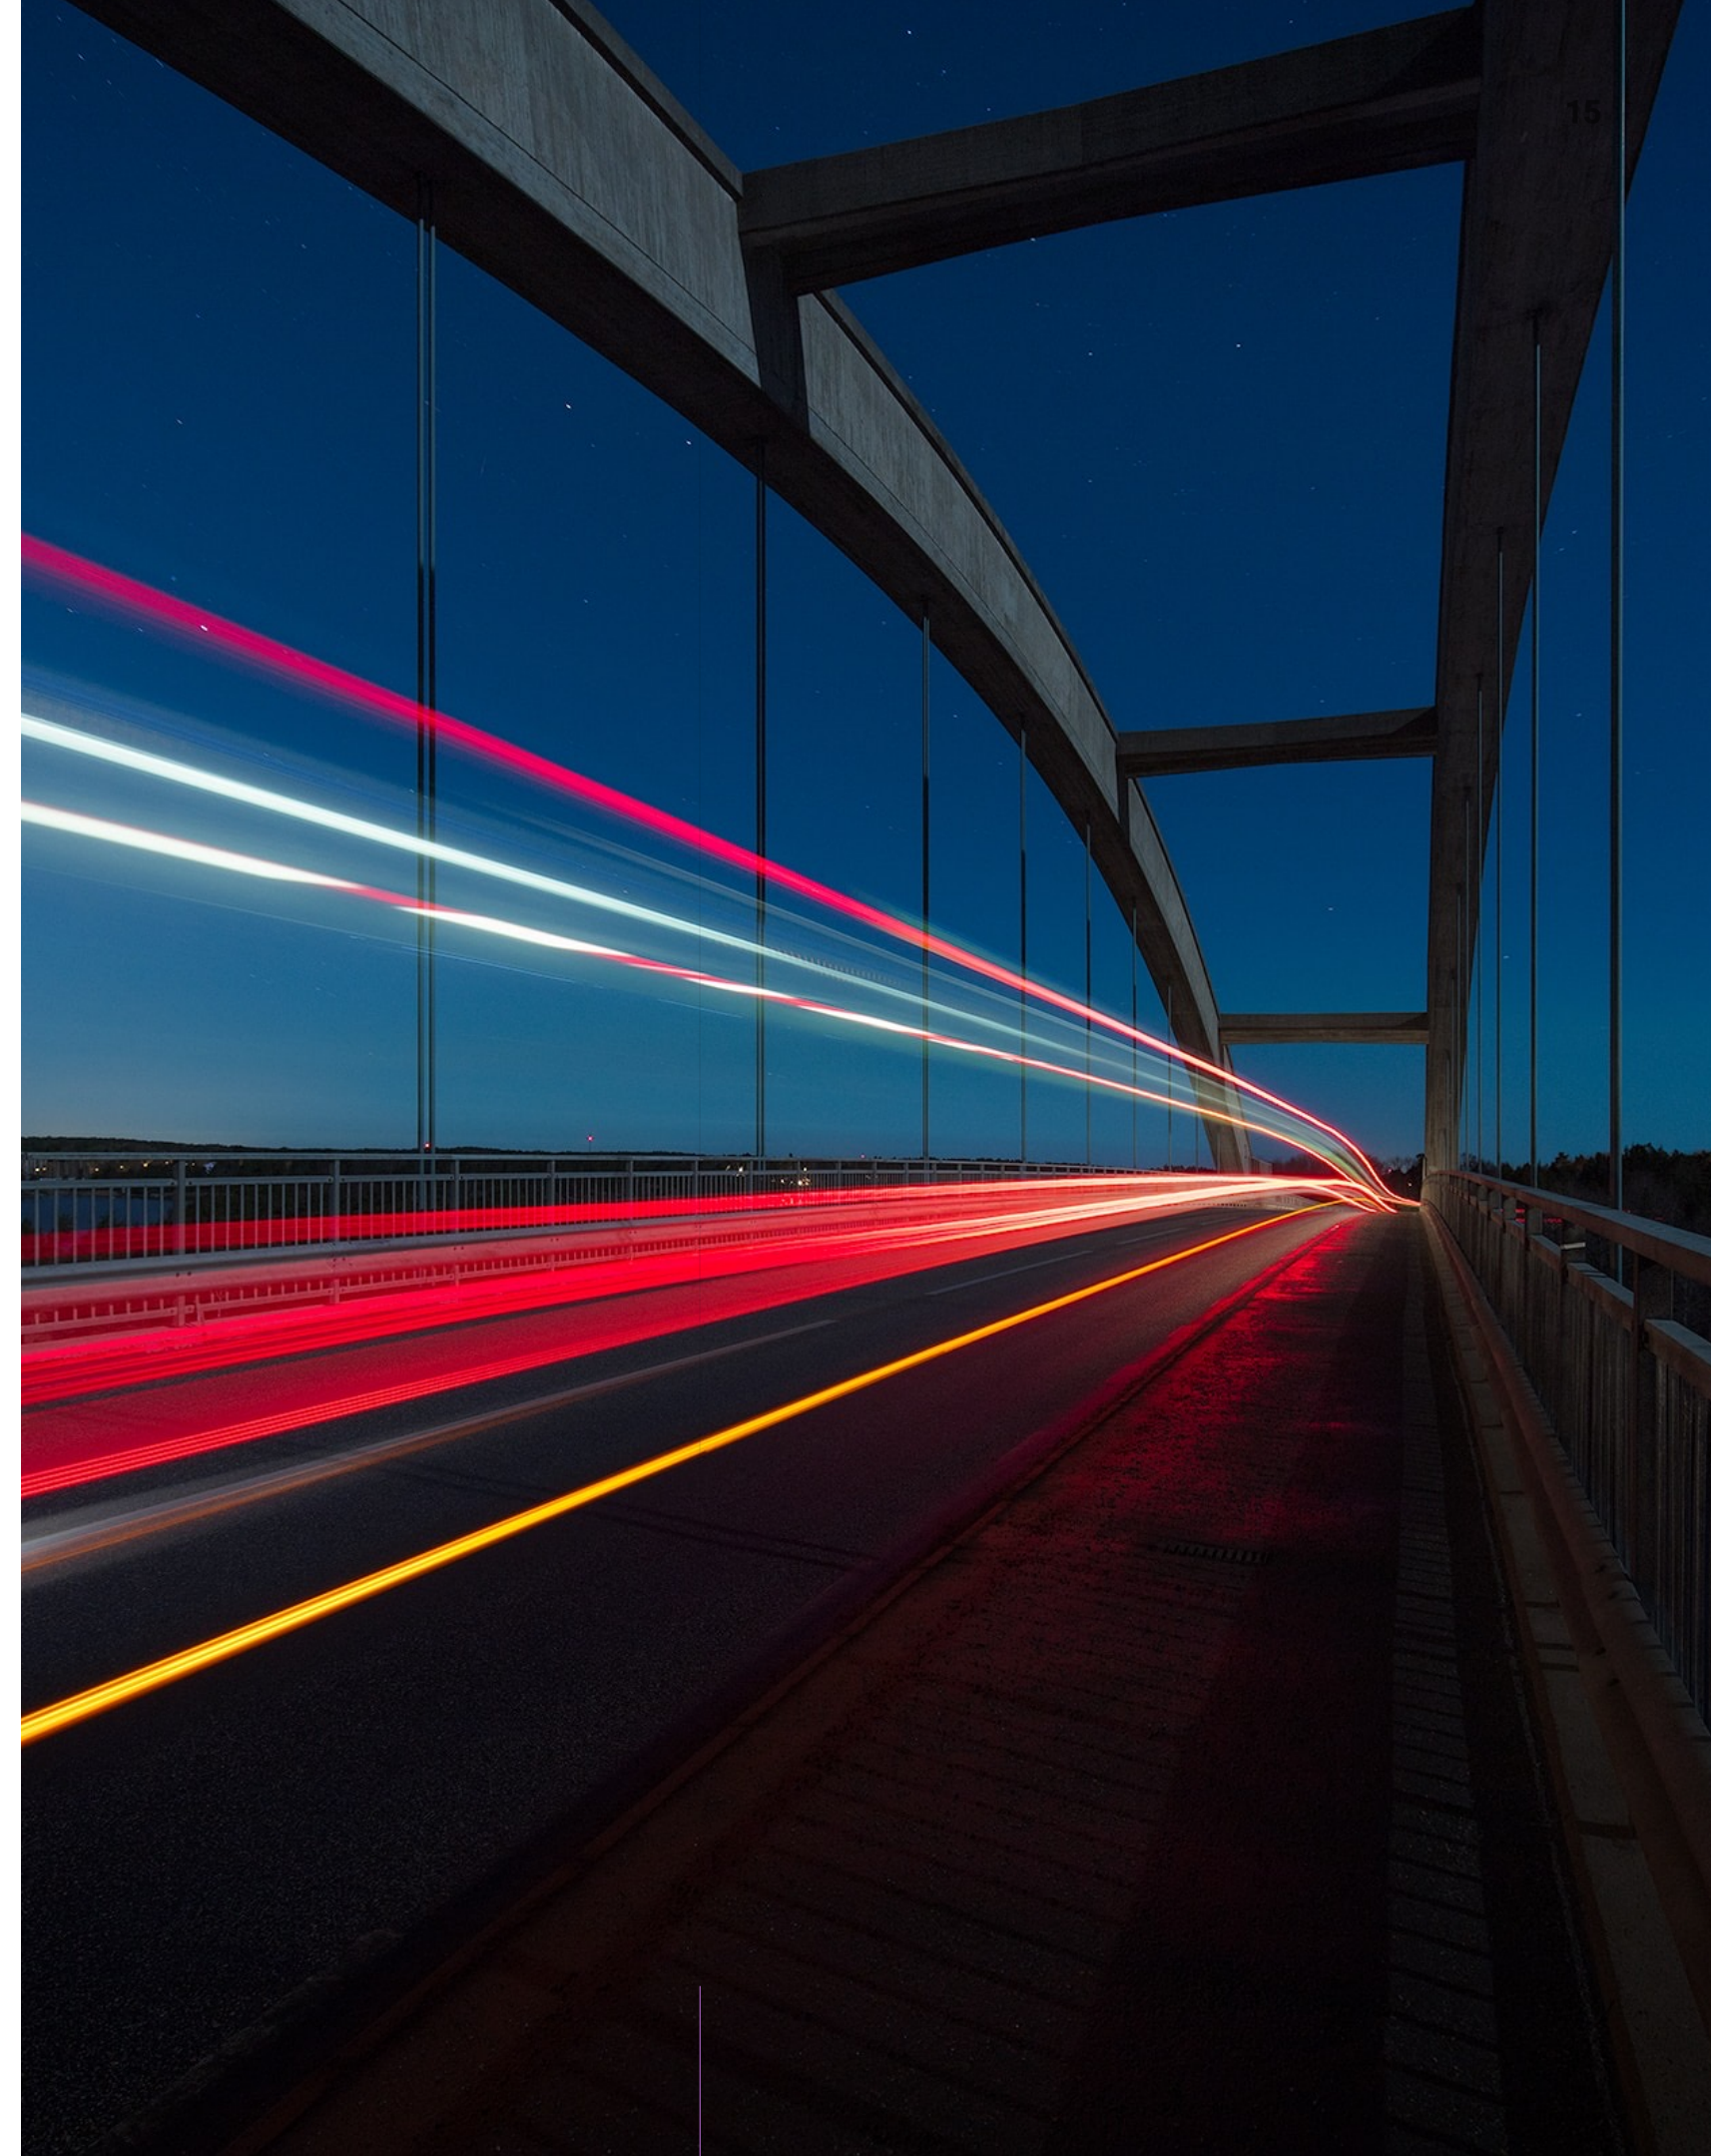

Electrifying progress

CATL is a global leader of new energy innovative technologies, committed to providing premier solutions and services for new energy applications worldwide. Due to the rise of electronic vehicles (EVs), CATL gradually became one of the leading battery providers in the world due to its early investments in EV battery technologies. China's dominant position in the battery manufacturing supply chain, including the control over rare-earth materials, provided an ideal foundation for Chinese companies like CATL to decouple from the monopoly of Western technology.

Electric

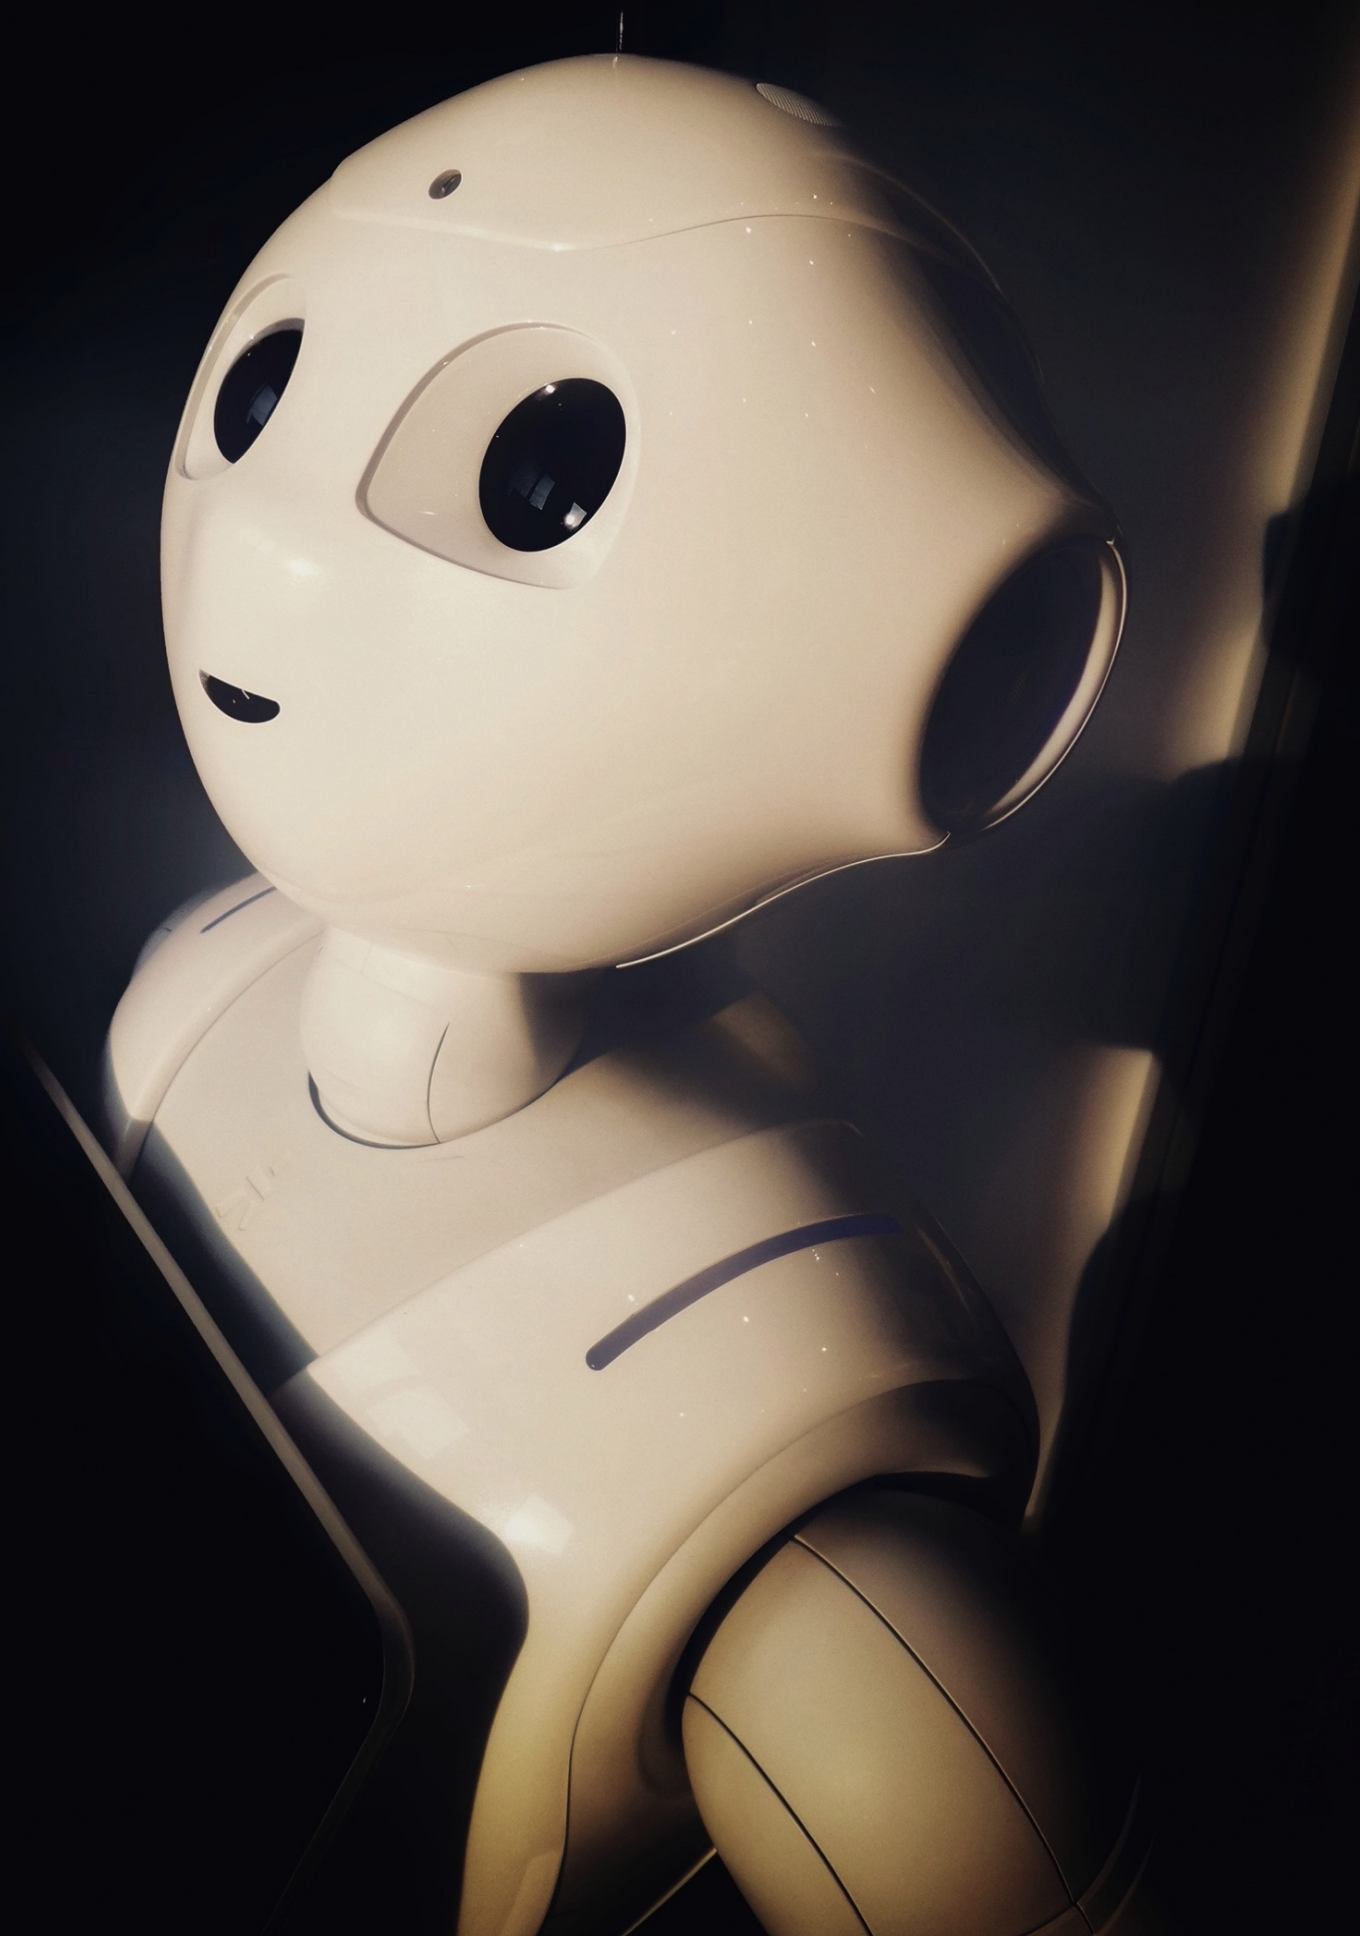

The future of service

KEENON Robotics Co., Ltd. is an artificial intelligence enterprise committed to providing intelligent unmanned delivery solutions for global enterprises. Founded in 2010, KEENON Robotics has become a dependable business partner in the global markets with coverage of over 60 countries worldwide. By applying advanced intelligent service robots and AI technology, the company has created efficient, stable, reliable and practical solutions, helping enterprises in various industries around the world improve service efficiency and realize intelligent upgrading..

Business & Collaboration model

Solution Provider

DATAFIR3 has the ability to host multi providers to enable a "one-stop" development program for your business.

- 1. Software as a service
 - Ready product (subscription)
 - Custom modules & development
- 2. Licensing & operations model:
 - Built & Operate
 - Build, operate & Transfer

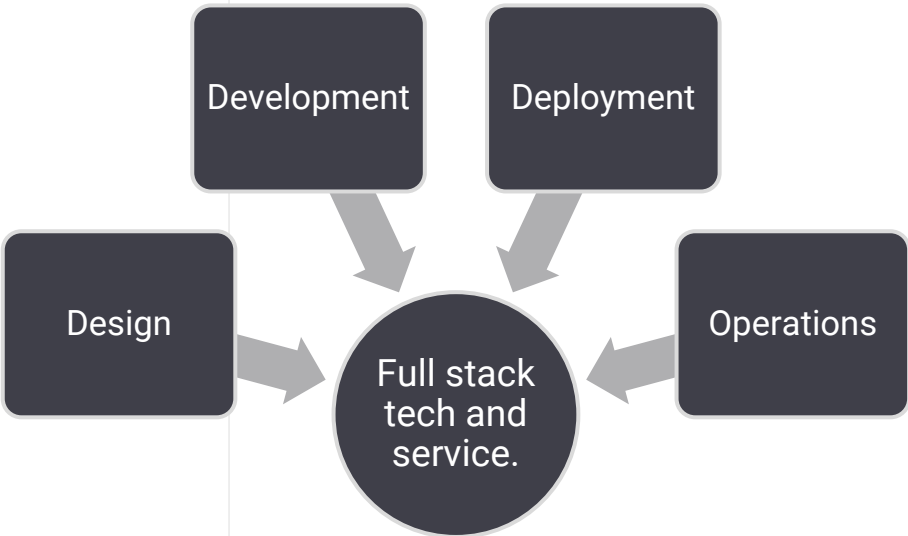

Service Provider

Platform & Operations as a service (PAOSRV) is a much-desired service among growing enterprises that does not want to incur additional OPEX & headcount to their digital transformation exercise while bearing the tech cost as well. This model allows the benefit of a subscription OPEX model that creates knowledge transfer and scalability as you grow and expand.

- 1. Cyber Security as a service
- 2. Acquisition as a service (fintech related)
- 3. Operations as a service (digital services)
- 4. Tech as a service

End to End (e2e)

Full project concession
