MARKET POTENTIAL

Market Potential is the most significant indicator in your report of the likely commercial success of your track. It combines both your Track Rating and your Passion Rating to provide you with a single aggregate score that predicts how commercially successful your track might be within your market. Your track's Market Potential score is calculated as a percentage between 0% and 85%. For the best odds of chart success, an artist should shoot for a score of 65% or better.

The Market Potential classification indicates where the track is positioned among over 100,00 other tracks.

Chart success assumes a reasonable promotional budget. It should also be noted that the relative success of a single is also directly related to the existing profile of an artist.

TRACK RATING

Your Track Rating is a weighted average of all the ratings your track received from our reviewers. This number reflects how highly reviewers thought of your track, but does not necessarily reflect your track's market potential.

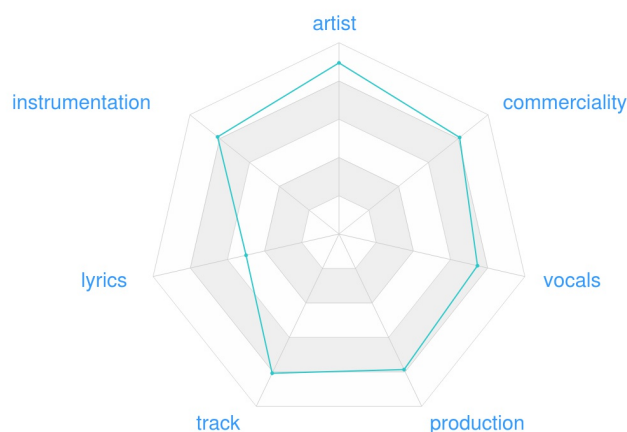

WORD CLOUD & REVIEW SEARCH

This section highlights the words that reviewers used the most when describing their reactions to your music. Click on any word to see expanded below all the reviews in which that word was used.

ELEMENT ANALYSIS

This data was generated utilizing technology that processed all of the words used in this report's reviews of your music, identified which words were used the most, and analyzed whether those words were used positively or negatively. This analysis is particularly useful for identifying which elements of your music you might want to prioritize for improvement. The farther out from the center of the circle a given element is, the more positive the sentiment around that word was.

REVIEWS

16-24		It's definitely in the country/ rock genre. The instruments are played really well and make the song better. The vocals are good and the singer can hit each note perfectly. It doesn't feel like they are straining their voice in anyway to hit the higher notes.	4
16-24		i really liked the piano at the beginning immediately getting my attention. maybe try to sperate the guitar away from the piano at the beginning as they both get lost in the drums. the piano helped the song a lot and worked really well. just work on the mix. the echo on the vocals was a bit too prominent and went on for a little too long at 420 is when the song shows off its real potential	7
16-24		The harmonica at the start lends the song to have a country feel which is juxtaposed straight away when the vocal starts and the song ends up with a soft rock feel which I think is really clever. The instruments and voice compliment each other.	10
16-24		I really love the piano so much at the hook and the unexpected heavy guitar is amazing as well. The harmonica also adds such a nice touch and i love the vocals a lot too. His voice is really great and perfect for this song.	8
16-24		This song was extremely interesting. I loved the mix of different genres and it was very different to anything I have ever heard. I believe the vocalist and intrumentalists were amazing, however, I do think the vocals were slightly dragged out more than I would like.	9
16-24		I love the instrumental and beat of this song very much. however I don't really like the artist choice of lyrics or his tone with delivering the message of the song. overall it is not that bad of a song and I would recommend it.	8
16-24		the intro is outstanding it's something that is completely different from the rest of the songs. the vocal is very strong and deep. the lyric is not shallow at all but it could be better. the beat is fine. the melody is very perfect. totally, I like it.	6

16-24		This music piece sounds like a Western lullaby. The slow pace of the guitar coincides with the vocalist's deep voice, which makes this piece more memorable. The blues electric guitar gives a sense of 'home' to the musical piece. I can see this track belonging in a Western movie.	6
16-24		The guitar and piano go quite well together in the beginning, the song does seem long but considering the quality of the singing and background instruments, it's easily forgettable as you get lost in the music. I enjoyed the piano in the background cutting through the drums too.	9
16-24		First of all, nice starting tune and use of instruments you should include more remixes which would most definitely improve the song. Also, tunes don't go to well with the singing audio the thing I like about it has a slow vocal cord which makes it slightly better. But overall, to be honest it doesn't have much potential or just at least not my type of song	4
25-34		The twinkling high pitched tones of the piano instrumental sound incredible. The harmonica is a very unique, different and rarely used instrument, it makes this song very interesting. The drawling tones of the electric guitar are addicting. The crooning vocal tone is very pleasant to listen to.	7
25-34		Ok the song was five minutes long and the song is slow and boring. He kept saying the same thing over and over again. The beat and lyrics is sad and depression. It's not a fun or delightful song to hear on the radio but it's average	9
25-34		Piano is nice at the beginning, cool when the harmonica comes in as well. And the feel and style of the song is nice. I like the flow of it and the instrumentation is really nice. Has a cool vibe to it as well. Nice blend of instruments and well sung.	7
25-34		This gives a soulful vibe thats bold and confident. The voice is very nice and blends well with the eletric guitar. The piano I don't feel like fits this song best - however, with a different direction of the delivery I believe it has a lot of potential to be a hit.	7
25-34		the instruments are so interesting. i like the use of repetition and the catchy beat. the piano sounds amazing. the pitch is good and the tempo is quite slow which i like. i think the singer has an amazing complimentary voice. the production is really good !	7

 25-34	<p>I like how the instruments sound nicely and naturally. The rhythm is slow and pleasant. I also like the voice of the performer. it is really well interpreted. the guitar solo is just amazing as well as the harmonica. I would definitely like to listen to it again.</p> <p>16-Sep-2022</p>	8
 25-34	<p>Ear catching piano workmanship in the beginning intro. The transfer of the piano to the other instrumentals was awkward. And then the artist voice didnt match with the piano. The guitar is nice, but doesn't really match with the piano at times, though it sounds like a modern recreation of the wild west cowboy saloon. I don't think this will be a hit. Just another song. He has a good voice and the music is good too. Seperate the two and create new versions for both. Guitar solo at 228 was sweet goodness!</p> <p>20-Sep-2022</p>	6
 35-44	<p>The combination of drums. harmonica and piano at the start was really dynamic and added style to the introduction. The artist is a competent singer who clearly is putting a lot of effort into his vocals, which are quite gravely in style. The piano parts of the song are extremely well played and add personality to the song. The melody is OK but a little plain and forgettable. The guitar instrumental was a good addition. The lyrics didn't feel overly meaningful or inspiring.</p> <p>15-Sep-2022</p>	3
 35-44	<p>I thought that this song was just okay. I thought that the background music was the best part of this song. The vocalist did not have a bad voice. However, there just did not seem to be anything special or edgy enough about the singer's voice for me to really like this song that much.</p> <p>15-Sep-2022</p>	6
 35-44	<p>This is one of my favorite songs I have reviewed. I love the twang sound at the beginning. The singer has a very nice voice that can sing rock or Broadway and is getting his vision across clear. I love the use of the guitar through the song and the soft piano sounds.</p> <p>16-Sep-2022</p>	10
 35-44	<p>As, it's going to be one of those tracks haha, there's way to many instruments on the intro I couldn't tell you what they all were, I didn't find the guitars very interesting on this one, they were a little bleak but the piano playing was entertaining, I didn't think it suited the rest of the song though, I wasn't loving this guys voice but decent drummer I'd say !</p> <p>16-Sep-2022</p>	4
 35-44	<p>The expressive combination of band music has a stirring effect, blazing through in a sentimental and meaningful fashion. A powerful singing voice takes hold, emotively spirited and invigorating. This melodic ballad has a significant harmony, with enticing rock beats to match to the fiery vocals. An enjoyable and captivating mix of lyrics and classic rock elements.</p> <p>16-Sep-2022</p>	9

The music is sublime, piano, mouth organ with fab guitar work. The production sounds so cool especially the drums and piano. Lyrically this song is with it, modern and slick. This guy has one hell of a vocal range, fantastic. This song should have no problems commercially.

16-Sep-2022

The voice is good and the music is good but I dont know that they are a match together. I like the piano part on in the song. This song is very long. It works for some songs but I dont think they have enough going on. to keep my attention for ober 5 minutes.

1

35-44

16-Sep-2022

Loving the harmonica in the beginning, it's a unique sound that not a lot of artists use. I found that the pace of the artist's singing was a bit off compared to the music in the background at times, but I like the voice and found that he had good range.

7

35-44

16-Sep-2022

The band has a nice touch to it. The harmonica sounded good in the beggining of this song. The lyrics make sense and I can hear what the singer is saying he is carrying a good tone. Couls possibly hear this at a bar or a restaraunt.

3

35-44

16-Sep-2022

A soft and happy opening, but then the harmonica was really loud in terms of the volume. There needed to have more logical meaning, and get the male vocalist to control his words and singing more. I thought the best thing about the song was that the singing was passionate and engaging. I think the song has potential but needs to go up a step in terms of structure.

6

35-44

16-Sep-2022

This artist has a pretty good singing voice, but not sure at all what this song is meant to be about. The lyrics were confusing. Havent the slightest clue what this song is about, and on top of that i wasnt too amazed by how it sounds. The hook was ordinary, and though the instrumental demonstrated good talent on behalf of the producer, this song just didnt do it for me.

4

35-44

18-Sep-2022

The production was overall great! I enjoyed listening to the song and hearing the song lyrics. The instrumentals gave me country vibes. I would buy this song if I saw it in stores. The singer showed great control of his vocals during the song. I enjoyed listening to it.

10

35-44

18-Sep-2022

When this song started I heard all of the beautifully played instruments. I hard harmonica, which is rare. The song is self is very melodic and the singer has a really soulful voice. The production in the song is undeniable and there is a lot of commercial potential.

7

35-

18-Sep-2022

This is very different, and I love the instrumental parts. I think it would do really well someday. I also like the singers voice and the mellow side of this song. I would add this to my playlist and would recommend to others. I would like to know who this is.

7

35-
44

18-Sep-2022

The good independent theme, and a good voice, although I feel that the piano does not look good in the musical arrangement, I would replace it with an electric guitar that has a calmer melody, the rhythm is a bit slow for people's current taste, but the voice if it is very well achieved.

6

35-
44

15-Sep-2022

I like the short piano intro. I was expecting something else. The harmonica at the beginning was cool. It has a new Pink Floydish vibe in a way, where the feel is laid back which is rather intriguing to me. Strong vocal performance. I find the song musically doesn't really go anywhere. It kind of stays in the same key. Only the story and the instruments playing during the vocal break move the song along.

6

35-
44

16-Sep-2022

What a strange and awkward intro! This is really old fashioned with clumsily performed guitars and a piano and very basic drums. The vocals kind of lack a decent melody and the mix doesn't sound that professional. This really doesn't stand a chance of any commercial success at least.

16-Sep-2022

The piano intrigued me at first when the song started. Then when the harmonica came in, it made me go "ooooh". I really loved how they used that instrument in this song. I also love the variety of instruments they used. It reminds you a lot of 80s rock songs on how they arranged it as well as how the lyrics are written and the delivery is made. I love it.

16-Sep-2022

Played well, a harmonica, really adds to a track, and this one does just that. We are then treated to an anazingly well played piano. Musically, this track is amazing and very powerful. As for the singer, i too loved their voice. The notes were held and sang effortlessly. Great guitar solo too. Just brilliant

35-
44

High pitched piano parts at the start, joined by good use of a mouth organ i think. I quite like the band and the use of the instruments they use, they sound a little different. The drums, pianos etc all have good natural and life sounding tones. The singer carries it well with his voice. If the songs themselves hook you in then great

16-Sep-2022

7

35-
44

Nice intro, If I had to guess the title to this song it would be "night watch man", also it could be categorized in the pop rock genre. The lyrical content is about self growth. Very talented musicians however the vocals feel detached from the instrumental part.

16-Sep-2022

6

35-
44

Some nice piano runs on this track, The vocals are great and soulful , The lyrical theme is dark and poetic which is nice to hear, a very soul searching kind of track, and musically really nice, good groove slow yet with a bluesy energy, production quality and the mix is excellent, it's a little light on a chorus hook but its a really great track with some great vox.

16-Sep-2022

8

35-
44

A short piano intro gives way to harmonica and a fuller and more sonorous score. It is a well recorded and produced blues tinged track. The lead singer has a good tone, pitch and expressiveness. He is backed by good musicianship. It is a well composed and arranged track.

DEFINITIONS

Weightings

The better a Reviewer is at judging the broader consensus rating of the track, the higher weighting their opinion receives. When calculating the Overall Market Potential, each Reviewer's track rating is weighted in accordance with their influence. For example a track rating from a highly respected Reviewer, who has proven to be accurate at identifying strong or weak tracks in that genre, can carry a much heavier influence than a track rating from a newer Reviewer.

Reviewers/Sample Group

This is the group of music consumers who have listened to the track online and left their track rating and written review. They are sourced from our sister site, Slicethepie and they do not know they are conducting market research when they hear the track, which helps to achieve honest and objective responses. The sample group is selected at random and screened by their age, gender, location and genre preferences. A diverse sample group of reviewers is required to form a "smart crowd" which ensures an accurate Market Potential. See "Wisdom of Crowds" below.

Wisdom of Crowds

Wisdom of Crowds is a proven methodology that large groups of ordinary people organised under the right conditions (a "smart crowd"), outperform small groups of experts in making decisions and predictions. It is not new. It is the science behind Google and decision-making in some of the largest companies in the world. It has been proven time and again that collective wisdom consistently surpasses the experts. It also means that SoundOut can guarantee a high level of accuracy with results.

The 4 conditions required to form a "smart crowd" that delivers an accurate result are:

1. Diversity of opinion: A sample group of reviewers with many different points of view makes better decisions than one where everyone has the same information.
2. Independence: The reviewers' opinions are not influenced by others.
3. Decentralization: Answers are given by individual reviewers based on their own local and specific knowledge rather than by a central person.
4. Aggregation: There is a way of accurately measuring the sample group's collective answer.
