One of the main goals of TAP's drowning stats reporting is to have up-to-date data that drowning prevention advocates can use to develop community support for their efforts. This means drownings are posted to our website in real time. Most advocate presentations need current data to solicit support. We present drowning information both in spreadsheet formats monthly, and a searchable database format that is not just updated, but updated multiple times daily, ensuring that you have the most current and relevant information at your fingertips, empowering you to make a real difference in your advocacy work.

### **SPREADSHEETS**

Spreadsheets are updated monthly and posted on our website the first of every month <a href="https://totalaquatic.llc/monthly-drowning-reports">https://totalaquatic.llc/monthly-drowning-reports</a>

### Drowning stats 16 years + 2024 forward

is a spreadsheet that incorporates totals for drownings since 2008 and list details starting in 2024.

### Drowning stats 1-4 yr. olds B

is a spreadsheet that list drowning details for 4 years old and younger. The NDPA focuses on the 4 & under drownings.

# National Drowning Prevention Alliance: NDPA

The **National Drowning Prevention Alliance** (**NDPA**) is a 501(c)3 non-profit organization dedicated to reducing the incidence of drowning.

## 16 year month by month Drowning comparisons

list the 4 age group categories month by month and year by year in the USA.

This spreadsheet (table format) is very popular to get an overview of all drowning numbers.

Totals are important to help achieve any presentations goal.

Listed below are categories and summary estimate numbers for drownings 2008 to 2023:
