Time Change

The time change this month could make life difficult for young children. Sleep is one of the most important factors in assuring for a happy and healthy child. The University of Michigan has a few tips to assist your child in getting the amount of sleep he or she requires. To get your child ready for the "spring forward" time change, they recommend adjusting their bedtimes 15 minutes earlier each night for a few nights before the clocks spring forward. Or you can keep them "on schedule" and not allow them to sleep in on Sunday — they should adjust to the new time in a few days.
