

Accessibility Services

Just a few home modifications can reduce the risk of falls, enabling physically challenged individuals to remain safely and independently at home.

Our professional services include home safety assessments by an Occupational Therapy Assistant (OTA) and installation by trained professionals as needed.

No Cost Home Safety Assessments

Our assessments identify and prioritize your safety issues at home. It takes about an hour to compile our observations and recommendations. You'll receive practical tips and suggestions to minimize home hazards and support your needs and independence. Some safety recommendations will be product or service related: from sturdy tub and shower grab bars (adaptive aids) to wheelchair accessible ramps. ***First time clients receive this special assessment at no cost!***

We recommend an In-Home Safety Assessment for:

- anyone who is recovering from an injury
- has had a life changing event
- planning for future aging at home
- making their home work better for a disability

Installing Grab Bars, Stair Railings

We assess the need for grab bars, determine their correct placement, and install grab bars in nearly any surface including tile, drywall and Fiberglass. We also design and install indoor and outdoor stair railings. Our sturdy railings and grab bars reduce the risk of falling in and around the home.

Wheelchair Ramps, Handicapped Ramps or Walker Steps Installation

Whether you have one or multiple steps, we'll provide a free evaluation and consultation to determine what ramp is best for your needs that provides a safe and accessible solution. We are accessibility specialists in ramp design and installation featuring wood wheelchair ramps, modular access ramps and aluminum handicapped ramps in Madison, WI. We

Accessibility Plus

are also the authorized QRamp™ Access Ramp System Dealer in Wisconsin. To view a video highlighting QRamp Features and Benefits [Click Here](#). You can see some examples of our custom ramp solutions on our photo gallery page.

Vertical Wheelchair Lifts and Stair Lifts Installation

These type of reliable wheelchair or stair lifts provide efficient and safe access to a raised deck, porch, or even floor to floor access inside your home. Accessibility Plus will review your existing layout and provide recommendations to make your home accessible.

Custom Roll-in Zero Threshold Showers, Step in Showers or Safety Tub Installation

From start to finish, Accessibility Plus completes bathroom accessibility and home safety projects like this in Madison, WI and the surrounding areas. We specialize in bathtub to shower conversions in solid surface or tile. Accessibility Plus is also an authorized installer for the **Safeway Safety Step** which converts your existing bathtub into a walk-in tub by lowering the threshold for stepping in and out of the bathtub.

Examples can be seen on our Photo Gallery page.

Accessible Kitchens

The kitchen is the heart of the home and is often the main gathering place for the family. Modifications can include roll out/drop down shelving to full accessible kitchen remodels. An **accessible home kitchen** will aid not only the disabled, but also make the kitchen safer and easier to use for the entire family.

We can also help with targeted modification items such as these and more:

hand-held showers to make bathing easier	nonskid strips or treads
raised/comfort height toilets or vanity installation	bath benches/shower seats
commode rails	cabinet and refrigerator safety lock installation
therapy swing installation	replacing doorknobs with lever handles and other safety enhancements
custom bed and chair raisers	interior and exterior safety gates
lexan or polycarbonate installation for safety	doorway widening for wheelchairs and walkers
specific task lighting	solid core door installation

No Surprises Pricing

Before any work begins we provide you with a written price quote. You'll know your cost (including materials and labor) with no surprises.
