

Capabilities Statement:

Modernize • Innovate • Transform

Overview:

Red Planet Group Inc. specializes in digital transformation services, custom software and platform development, end-to-end security solutions, network infrastructure assessment and optimization, and business strategy consulting to support state, federal, and commercial organizations in achieving their objectives.

Our team is composed of former members of Fortune 500 companies, bringing extensive experience and a proven track record of success in collaborating with federal agencies. We possess a deep understanding of the market and are committed to delivering innovative products that are on time, within budget, and aligned with your business needs, without compromise (see “**Past Performance**” section for further details).

Additionally, being a small disadvantaged & minority owned business under the criteria outlined by the SBA, Red Planet Group Inc. is eligible for small-business set-asides.

Past Performance:

Our team at Red Planet Group Inc. has successfully completed a variety of contracts with the following federal agencies during their tenure at Fortune 500 companies (*these projects were not delivered by Red Planet Group; sub-agency names are being protected*):

1. **Department of Justice:** successfully launched a modernized careers website and implemented a custom Salesforce-based HR management tool, replacing an outdated Excel-based process for tracking and engaging potential candidates. This digital transformation significantly improved HR operations, streamlining workflows and enhancing overall efficiency across the department.
2. **Department of Energy:** Our team members had the opportunity to play a pivotal role in a large-scale ERP implementation for the DOE. The agency was transitioning from Oracle EBS Suite to SAP S/4HANA, we were entrusted with managing, tracking and defining the re-integration process for all boundary systems related to finance, HR, and project management, etc. These systems, originally integrated with Oracle EBS, were being re-integrated with SAP S/4HANA. This project highlights our team’s ability to rapidly acquire expertise in new technologies beyond our primary focus, ensuring a smooth and efficient transition.
