

HELP ADVANCE RESEARCH FOR LIMB-GIRDLE MUSCULAR DYSTROPHY (LGMD)

Share your experience and make a difference!

WHAT IS THE STUDY ABOUT?

Clarivate, a research consultancy, and Sarepta Therapeutics, a pharmaceutical company, are conducting an interview research study to understand how LGMD affects your daily life and gather feedback on related questionnaires.

The interview will be conducted online, and participants will be compensated. All personal information will be kept confidential.

WHO CAN PARTICIPATE?

We are looking for individuals with **LGMD2C/R5, LGMD2D/R3, or LGMD2E/R4 and/or their caregivers** in the U.S., Puerto Rico, U.K., or Canada.

- **Adults:** People who are 18 years old or older.
- **Kids and Teens:** Children aged 8 to 17 years old.
 - For kids aged 8 to 11, the interview will include their caregiver.
 - For teens aged 12 to 17, the interview will be one-on-one, but caregivers can join to support.
- **Caregivers:** Caregivers (Age 18+) of children aged 7 years or younger with LGMD.

WHAT IS INVOLVED?

The study involves a **one-time, 90-minute online interview**. You will be asked to discuss your/your child's experience with LGMD and to review and discuss several questionnaires. This is an opportunity to share your personal journey and contribute to valuable research that could benefit others with LGMD.

If you are interested or would like more information, please email LGMDStudy@clarivate.com to connect with the research team. You can also click on this advertisement to open a draft email to make contacting us even easier.
