## 🎵 CHANGE, CHANGE, CHANGE! 🎵

We would like to welcome back Ron Grow to our team! Ron and his wife Kim have relocated back to Ohio from Florida and Ron will be taking over as our installation manager.

Also, Jeremy DePew, our former installation manager has moved over into our commercial service department. We know he will do extremely well in that department.

Lastly, Shawn Kellough, our former General Manager has left Affordable Air to start a consulting business with his wife. We wish him the best of luck!

## EMPLOYEE SPOTLIGHT

IT.**

## Breathing Easy

All homes, no matter how clean they appear, are contaminated with dirt and dust. According to the EPA, the air inside the average home is up to five times more polluted than the air outside. If someone in your home suffers from allergies or asthma, you already know the negative impact that polluted air can have. And those harmful particles could also include airborne viruses, leading to an increased likelihood of colds and flu. You can fight against indoor air pollution with a whole-home air purifier.

A whole-home air purifier is installed as part of a central heating and cooling system to effectively remove airborne pollutants. Air runs through the filter media and clean air is delivered in every room, silently and efficiently.

Let us help determine the air purifier that works best in your home. We're here to help keep your family breathing easy.

## **USEFUL TIP!**

**Installing a surge protector on your heating and air conditioning system protects expensive heating and air equipment when you are away.**

**Not cleaning out your clothes dryer vent could set you up for a home fire. Clean the lint screen after every load. And have the dryer duct inspected and cleaned annually (depending on dryer usage) to remove any blockage in the dryer vent system.**

## **GOT QUESTIONS? WE HAVE ANSWERS!**

**Q. Will my ductwork need to be replaced if I purchase a new heating and cooling system?**

A. Depending on the size and capacity of your new system, the answer may be yes. Your existing ductwork was designed to work with your current heating and air conditioning equipment. When upgrading to new equipment, the existing ductwork may no longer be capable of handling the airflow requirements of the new system. After a complete analysis, we'll be able to determine if a ductwork replacement or retrofit is required. If the existing ductwork is compatible with the new system, it'll be thoroughly checked for leaks. Leaky ductwork not only affects comfort, it also decreases the efficiency of a heating and cooling system, forcing more energy use than necessary to keep your home comfortable. Correctly sized, designed and installed ductwork is an integral part of a comfort system and helps you get the most from your investment. Rely on our advice and expertise to determine what is best for your home and comfort.

### **REMINDER!!!**

With summer just around the corner it is time to have your air conditioner maintenance performed.

## BEST BANANA PUDDING RECIPE EVER!

Well in our humble opinion of course. It is no secret that we love to eat over here at Affordable Air and our Marketing Director, Heather Palmer likes to bring in goodies for us. She has brought this banana pudding into the office a few times and we almost lick the bowl clean! Give this recipe a try and let us know what you think.

### BANANA PUDDING

- 1 (5 ounce) package instant vanilla pudding mix
- 2 cups cold milk
- 1 (14 ounce) can sweetened condensed milk
- 1 tablespoon vanilla extract
- 1 (12 ounce) container of Cool Whip
- 1 (16 ounce) package of vanilla wafers
- 14 bananas, sliced

In a large mixing bowl, beat pudding mix and milk 2 minutes. Blend in condensed milk until smooth. Stir in vanilla and fold in whipped topping. Now at this point you can put this together one of two ways. The traditional way and layer wafers, bananas and pudding mixture in a glass serving bowl or the Affordable Air way which is just stir the pudding mixture, vanilla wafers, and banana slices together in a glass serving bowl. Chill until serving.

### DID YOU KNOW?

Bananas grow on plants that are officially considered an herb.
