

General Welfare Requirement: Safeguarding and Promoting Children’s Welfare

The provider must promote the good health of the children, take necessary steps to prevent the spread of infection, and take appropriate action when they are ill.

Promoting health and hygiene

Animals in the Setting

Policy Statement

Children learn about the natural world, its animals and other living creatures, as part of the Early Years Foundation Stage curriculum (2021). This may include contact with animals, or other living creatures, either in the setting or in visits. We aim to ensure that this is in accordance with sensible hygiene and safety controls.

7 Key features of effective practice

The best for every child	High quality care	The Curriculum	Pedagogy	Assessment	Self-regulation and executive function	Partnership with Parents

Procedures

Animals in the setting as pets

- If we decided to have a Pre School pet, we would take into account the views of parents and children when selecting an animal or creature to keep as a pet in the setting. We would do this by email/book bag post for parents and speak to the children using our whiteboard to research suitable pets for pre-school.
- We carry out a risk assessment, seeking advice if necessary from a vet or animal homing centre, relating to any hygiene or safety risks posed by the animal or creature.
- We provide suitable housing for the animal or creature and ensure this is cleaned out regularly and is kept safely.
- We ensure the correct food is offered at the right times.
- We make arrangements for weekend and holiday care for the animal or creature.
- We register with the local vet and take out appropriate pet care health insurance.
- We make sure all vaccinations and other regular health measures, such as de-worming is up-to-date and recorded.

Children are taught correct handling and care of the animal or creature and are supervised.

- Children wash their hands after handling the animal or creature and do not have contact with animal soil or soiled bedding.
- Staff wear disposable gloves when cleaning housing or handling soiled bedding.

- If animals or creatures are brought in by visitors to show the children, they are the responsibility of the individual owner or organisation such as Zoolab.
- The owner carries out a risk assessment, detailing how the animal or creature is to be handled and how any safety or hygiene issues will be addressed.
- If we have visiting animals, we will inform parents and ascertain whether children have any allergies or fears.

Visits to farms

- Before a visit to a farm a risk assessment is carried out - this may take account of safety factors listed in the farm’s own risk assessment which should be viewed.
- The outings procedure is followed.
- Children wash their hands after contact with animals.
- Outdoor footwear worn to visit farms are cleaned of mud and debris and should not be worn indoors.

Legal framework

- The Management of Health and Safety at Work Regulations 2006
