22 Butcher Row, Shrewsbury

Avoid getting the area wet for the first 24 hours after the procedure

Do not apply any makeup or creams to the treated area for at least a week

Avoid direct sunlight and tanning beds, as this can cause the pigment to fade

Avoid sweating excessively for the first week, as this can cause the pigment to smudge

Do not scratch or pick at the treated area, as this can cause scarring and uneven pigment fading

Use a gentle cleanser to clean the treated area twice a day

Apply a thin layer of a healing ointment recommended by your microblading artist to the treated area daily for the first week

Enjoy your new brows
