

Let's Control Government Spending in Montgomery County, Maryland

We have an unparalleled opportunity to make a difference in the spending habits of the Montgomery County, Maryland government.

The County Executive and County Council have a long history of reckless spending relative to other jurisdictions, causing them to raise taxes to support their lofty goals.

We find ourselves with yet another round of tax increases in under two years. The County tax-and-spend direction, on top of the pending State tax increases, will make living in Montgomery County unbearable. These policies will force people and businesses to leave the County and further erode our tax base.

This is our chance to impose financial discipline on the County Executive and County Council. At some point, hard choices must be made and spending trimmed to provide the best return on our tax investment. Currently, the County Council proposes budget increases under the guise of education; however, once the tax money is raised it is swept into the general fund and used at the discretion of the Council.
