- DTC adjustable hinge with soft close feature
- Metal Shelf pins
- Rubber Door bumpers

How to Order

To Order:

Specify the 2-letter door style followed by the product number for the cabinet.

The Delicate Art of Cleaning High Gloss Kitchen Cabinets

Cleaning high-gloss cabinets requires finesse and meticulous attention to detail. Using cleaners or rough cleaning materials can potentially harm the finish and mar the reflective surface. Here is your step-by-step guide for achieving a showroom shine without compromising quality.

Gentle Cleaning Tools for Achieving a Clean Glossy Results

When it comes to cleaning high gloss cabinets, using tools is crucial for obtaining results. Make sure to choose the tools for the job to avoid any scratches and achieve a shiny finish.

Microfiber: Opt for a cloth or pad made of microfiber, as its fine fibers are great at capturing dust and dirt without causing any damage. Use it gently to wipe down your cabinets and remove any surface grime.

Mild Soap Solution: Create a solution by mixing water with a dish soap that is gentle and non-abrasive. Dip the microfiber cloth into this solution making sure to wring out any water, and then use it to wipe down your cabinets. Be careful not to use moisture, as it can harm the wood beneath the glossy finish.

Avoid Abrasives: Avoid using cleaners that contain abrasives scouring pads, or harsh chemicals. These products can strip away the gloss from your cabinets, leaving behind scratches and diminishing their shine.

Taking Care of Stains and Spills

Stains and spills are bound to happen. They don't have to be permanent. Handle these challenges with care in order to maintain the appearance of your high gloss cabinets.

Dealing with Grease and Oil: When dealing with grease and oil on your kitchen's high gloss cabinets soak a cloth in a mixture of water and mild detergent. Gently wipe away the grease using this cloth, remembering to rinse it so you don't spread the grease around further.

Removing Water Marks: To get rid of watermarks or slight discoloration, create a paste by mixing baking soda with water. Apply the paste to the area. Gently rub it in using a soft clean cloth, moving in circular motions. Wipe away the paste. Ensure the surface is dry.

Dealing with Stubborn Stains: If you come across any stains, mix equal parts of vinegar and water to create a solution. Dampen a microfiber cloth with this solution. Gently rub the stain. However, testing this solution on an area is always wise to ensure it doesn't affect the glossy finish.
