

# Learning Ecosystems Design

Community Driven, Learner Centered Transformation

---

## Ecosystem Design Services

---

LED ecosystem design services include the following:

- ✓ Defining the why and the desired future (the answer isn't inside the local education agency)
- ✓ Building a radically inclusive, co-created local coalition for change. (again, it often doesn't start inside the local education agency)
- ✓ Understanding what reciprocal leadership and transformation are and the elements and characteristics that create this new culture
- ✓ Creating a roadmap to your northstar (the WHY)
- ✓ Identifying sustainable resources
- ✓ Mapping and aligning policy flexibilities and challenges
- ✓ Advocating for the new design
