

Science classifies living things into 5 kingdoms:

- **Animals.**
 - **Wildlife** is animals living in the wild (not captivity).
- **Plants.**
- **Bacteria.**
- **Fungi.**
- **Protozoa (amoebas, etc).**

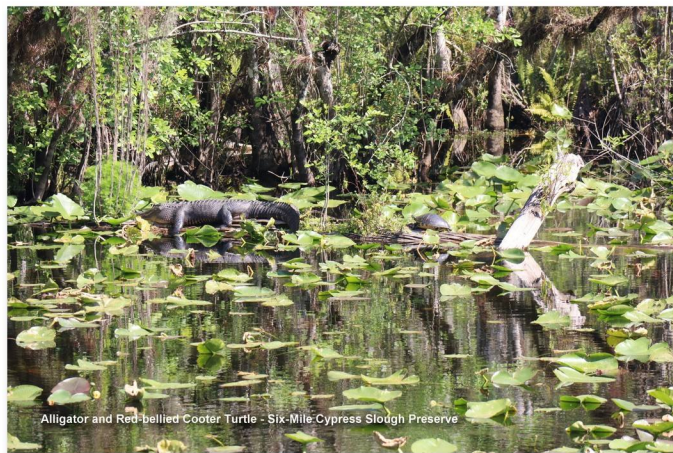

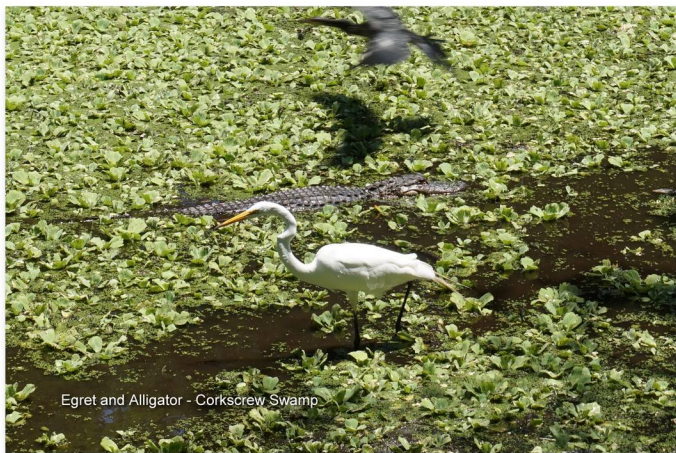

Animal kingdom - 2 main groups:

- **Vertebrates** - have backbones and internal skeletons.
 - **Invertebrates.**
- Vertebrates = mammals, birds, reptiles, amphibians, and fish.**
- Around 70,000 species.**
- **Smallest:** Kind of frog 0.3 inches.
 - **Largest:** Blue whale 108 feet.

Invertebrates – no backbones or internal skeletons. These include:

- **Insects.**
- **Arachnids (spiders).**
- **Snails.**
- **Crustaceans.**
- **Clams.**
- **Corals, squids, others.**

Total: Around 1,300,000 species.

Alligator - Corkscrew Swamp

American Alligator Close-up - Six Mile Cypress Slough

Alligator Sunning on Turner River Road, Ochopee, Florida

Anhinga - Audubon Corkscrew Swamp

Apple Snail - Collier-Seminole State Park
