Coloring/Pattern/Markings:
Date Whelped:
AKC/CKC Registration Number
Microchip Number:
Sire:
AKC/CKC #
Dam:
AKC/CKC #

Total Price: Pick of the Litter

Process: It is understood that since Breeder and Stud owner live far apart, the two shall meet at an agreed time, and Breeder will meet in stud owner's town. Stud service will be in the form of natural cover or fresh semen properly collected an administered. Should bitch be deemed ready at initial meeting, natural tie or AI will proceed at that time. It is agreed that Stud Owner will determine at what point in time to Artificially Inseminate. Breeder authorizes this service to be performed on bitch at no charge or compensation to the Stud Owner. Furthermore, she holds harmless Stud Owner from any subsequent adverse health issues which may arise. If veterinary services are required, Breeder agrees to pay all costs. Additional or extraordinary costs for transport or shipping of semen, or other unforeseen costs also to be paid by Breeder. Breeder understands her role in maintaining bitch in situ whilst conception takes place. This process could be up to one hour in accomplishing a successful mating. At the time of the meeting, should bitch be deemed not in estrus, bitch owner agrees to relinquish temporary possession to stud owner who shall take bitch to her address (above) and return her once conception is presumed to have occurred.

Litter: A litter is defined as being at least two puppies. If less than two or no puppies are produced, or one puppy is not desirable for compensation for stud fee, a second mating will be consummated during bitch's next heat and all other terms and conditions laid out in the agreement will apply.

If for any reason the bitch cannot have anymore puppies after this litter due to complication and there is only 1 puppy, the stud owner will be compensated a monetary value of ($)_____. Verification from vet is required if this is the only choice. Payment of stud if puppy cannot be produced because of bitch's in ability to welp again is due to breeder within 7 days of vet visit.

Communication and Whelping: During pregnancy and whelping, Breeder agrees to communicate frequently and update Stud Owner via Facebook Messenger, SMS or by Telephone. Specifically, Breeder agrees to notify Stud Owner during optimal times of conception/ovulation of Bitch. During pregnancy, all vet visits should be communicated and photographs of x-rays provided to Stud Owner. X-rays shall be performed no earlier than day 55 (from conception date) or later than day 60 (from conception date.) Notification of whelping shall be made within 2 hours of whelp. Breeder guarantees to have an established relationship with a Louisiana licensed veterinarian who will be available if any difficulty arises either during

pregnancy or during whelping. If C-section is deemed required, Breeder agrees to incur those costs in total. Otherwise, Breeder assures her competency in assisting delivery of puppies. She will have a proper whelping kit and assures adequate diet and nutrition to the bitch during pregnancy and whelping. Breeder agrees to not remove dew claws from puppies' front legs, but to remove those from the back legs. Breeder promises that puppies will be kept in a warm, healthy environment, protected from danger and from the elements. She agrees to administer a suitable wormer to puppies at 2, 4, 6 and 8 weeks of age. She will keep puppies indoors until 4 weeks of age.

Litter Registration: Total cost of CKC/AKC registration of the litter to be incurred by Breeder. Stud Owner agrees to sign registration papers in a timely manner and not to impede with the registration process. If registration of litter is unable to be accomplished for any reason, Stud Owner agrees to accept pick of the litter as compensation. If the litter can be duel registered it's the responsibility of the Breeder to at least register AKC.

Culmination: Stud Owner will make her pick from the litter by at least the time puppies are 8 weeks old. Before pick is made, no puppies are to be promised or sold to anyone. Delivery of chosen puppy will be at agreed destination, midway between bitch owner and stud owner, similar to or exactly the same as the place of original meeting.

By signing below, Breeder and Stud Owner warrant that each have clear ownership and are fully licensed to breed the above-named bitch and stud and are the sole owners of the dogs. Additionally, the Stud Owner and Breeder warrant that bitch and stud are in optimal health to breed. They are up-to-date on all vaccines and are free from fleas, ticks, worms or other parasites. Breeder guarantees that this bitch will not be exposed to any other male during this heat.
