

# Ivanti Endpoint Manager

Ivanti is a recognized leader in client management tools. Ivanti® Endpoint Manager, powered by Landesk, increases user and IT productivity by helping IT administrators gather detailed device data, automate software and OS deployments, and quickly fix user issues. It integrates and unifies the management of all end-user devices and provides core IT management services that can be leveraged by other solutions from Ivanti or Ivanti partners.

## Discover the Data that Helps IT Control Assets, Compliance, Costs, and Security

Ivanti Endpoint Manager provides extensive data about managed and unmanaged devices through industry-leading discovery and inventory technology. This information is key for boosting your level of insight into and control over business risks and costs due to:

- Software compliance fines and over-purchasing licenses
- Failing to meet corporate service level agreements
- Security vulnerabilities on end-user devices
- Excessive energy bills

## Unify Endpoint Management

No matter what leading device or OS your users have in their hands, you can manage various endpoints and operating systems with Ivanti Endpoint Manager including:

- PCs/Servers—Windows, macOS, Linux, Unix, and Chromebooks
- Mobile Devices—iOS, Android, and Windows

You gain one-click access to see, configure, and manage the IT policies and processes related to users and groups and all their associated devices. Intelligent actions such as setting policies or distributing software take effect only on the user devices where it makes sense.

## Provide Insight and Take Action—All Within Role-driven Workspaces and Dashboards

Ivanti Endpoint Manager provides an array of role-based workspaces with integrated dashboards for end users, administrators, and IT executives. And with the ability to customize dashboards and reports with Xtraction, you have the visibility you need to show how effective your IT initiatives are. These insightful dashboard, customizable reporting, and alerting tools include:

- Information and visual content about user devices
- Gantt charts and status for software rollout projects
- Role-based console and workspaces with integrated actions
- Business value dashboards that can link to multiple data sources
- Proactive monitoring alerts

### Improve Productivity and Modernize IT

Ivanti Endpoint Manager is core to enabling a more user-centered approach to IT. Automate IT tasks and modernize the experience to improve productivity for both IT staff and end users. Minimize issues that threaten user productivity caused by system outages, device downtime, OS upgrades, and change and configuration activities. Save IT administrators from jumping between multiple consoles and free up time for more business-related initiatives.

### On Premise, In the Cloud, or as a Managed Service

Where some vendors provide one delivery model only, Ivanti gives you the same unified endpoint management functionality and benefits either on premise or in the cloud. When in the cloud, choose to either use your own administrative resources or leverage Ivanti’s expertise to handle your core management needs. Gain the flexibility around how you expense your IT and how you deliver IT.

### True Unified Endpoint Management for All Your Devices

Ivanti Endpoint Manager gives you the ability to manage every user and any number of devices they use. The following table provides a quick overview of the leading management capabilities available for each end user device.

| Windows and MacOS                       |  | Mobile Device Management         |  | Other Platforms and Add-Ons            |  |  |
|---|--|----------------------------------|--|--|--|--|
| What's Included                         | Capabilities   | What's Included                  | Capabilities   | Other Platforms                        | Capabilities   |  |
| Core Management                         | Active, passive, and agentless discovery and inventory   | Core Mobile Device Management    | Active, passive, and agentless discovery and inventory               | Linux                                  | Active and passive discovery and inventory   |  |
|   | Configuration and policy management  |                                  | Enrollment and device restrictions                                   |  | Software distribution  |  |
| Remote Assistance                       | Secure remote control—from any HTML 5 browser  | Mobile Application Management    | Device lock and selective wipe                                       | Chromebook                             | Active and passive discovery and inventory   |  |
| OS and Software Management              | OS provisioning and migration  |                                  | Self-service workspace for end users to access apps, docs, and links | Unix                                   | <b>Top Add-Ons</b><br>Cloud Services Appliance   | <b>Capabilities</b><br>Active and passive discovery and inventory<br>Manage remote offices/users through Internet connection without needing a VPN |
|   | Software packaging, distribution and automated rollout projects  |                                  | User-targeted application distributions                              |  |  |  |
