

# Nextthink Integrate

Infuse the End-User Experience Across Your Digital Ecosystem

## INTEGRATE ANYWHERE AND EVERYWHERE

Infuse your IT infrastructure with the end-user perspective and boost employee digital experience, improve service delivery and accelerate troubleshooting. Nextthink Integrate provides an efficient way to share real-time end-user data and insights with any third-party software solution through web API access and certified prebuilt integrations. Put your most critical stakeholder —the business consumer— at the heart of your IT operations.

## A SIMPLE WAY TO INTEGRATE NEXTHINK

Our interface makes it easy to query your database and enrich your IT ecosystem with the power of Nextthink, in real time. We pride ourselves on our seamless integrations firmly embedded into your existing business processes and IT infrastructure. We provide remote actions that can be triggered through 3rd-party self-service portals and ticketing systems alongside investigation-based alerts.

## OUR GROWING LIST OF INTEGRATIONS

Customers have successfully integrated Nextthink throughout their ecosystem. Integrations can be carried out inhouse, or by leveraging the expertise of Nextthink Professional Services and our global Partner network.
