

# Nextthink Enhance

## Improve Threat Intelligence Monitoring

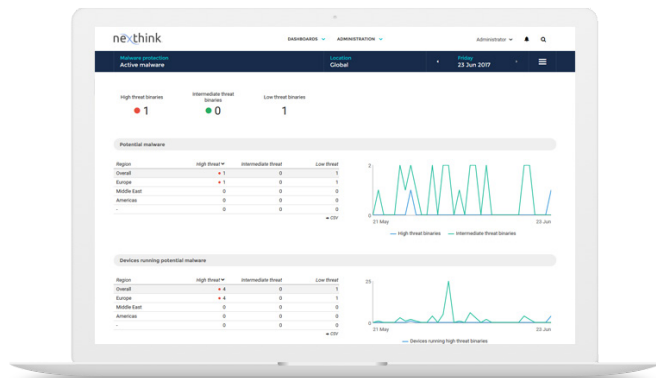

### PRODUCT DESCRIPTION

Nextthink Enhance helps organizations better manage their endpoint security and compliance by providing additional intelligence to identify information security risks at and from the workplace. Focused on improved threat intelligence monitoring, Nextthink Enhance enables IT departments to highlight suspicious activities from endpoints on software usage, detect malware, detect risky web browsing and characterize web traffic with blacklisted countries. Safeguard your IT ecosystem with confidence.

### KEY BENEFITS

- Detect security threats in real time
- Proactively identify security threats
- Validate employee security practices

### Features

- **Application category**  
Classify the types of applications by their business use
- **Threat level**  
Compare digital footprints of binaries against an up-to-date reference database
- **Web domain reputation**  
Detect access to potentially dangerous websites
- **Web domain category**  
Classify web content type behind domains
- **Web hosting country**  
Identify country that hosts servers of external domains
