

MEGA FILTER FILTRATION SYSTEM

ROCKS STOP HERE. FLOW DOESN'T.

DESCRIPTION

The Mega Filter Filtration System is a heavy-duty water strainer engineered for sand-laden fluids in frac applications. Built to protect critical equipment by removing rocks and other large objects from fracture fluid, it helps reduce wear, extend equipment life, and support dependable operation.

FEATURES

- Integrated bypass allows cleaning without interrupting operations.
- Heavy-duty skid-mounted construction
- Integrated assisted-lid handling system
- Service-friendly access and maintenance design

SPECIFICATIONS

Model: Mega Filter
Pipe Size: 8" or 10"
Flow: 120 BPM
Filtration Rating: down to .13
Max Pressure: 200 PSI
Footprint: 60" X 84"
Internal Components: Ceramic Coated
