

**Pope Francis' Prayer Intention in November** - Artificial Intelligence: We pray that the progress of robotics and artificial intelligence may always serve humankind.

**Continuing the Pope's September theme of caring for creation**, here is further information which may help you make personal decisions on lifestyle which may help the planet. Experts from various countries agree that, after reducing waste, the next most important decision we can take to limit climate change is to reduce consumption of ruminant meat. Ruminant meat is mainly beef and lamb (and a few others) and the reason why these animals worsen climate change is because they produce methane as part of their digestion. Methane is as harmful a "greenhouse gas" as carbon dioxide, and it has been calculated that ruminant animals worldwide produce as much of a greenhouse effect as all the aeroplane travel in the world. The harm is even greater if the meat is imported, with the effects of transport pollution, or raised non-organically, with damage from other foodstuffs. No-one is suggesting that everyone should be vegetarian. Just remember. Live simply. Think about what you buy and eat."

Dear Brothers and Sisters,

There is a story about a mother and child. The child asks his mother, "Mum what will happen to us when we die?" The mother tries to explain to the child that sometimes you have to wait a long time for your father to come home from work and you fall asleep. But when you wake up in the morning you are in your father's arms. Just like that when we die, we are sleeping and then when we awaken, we will be in the safe hands of God. That gift is the gift of life. All of us were created by God. No matter what the circumstances of our birth were, none of us is a mistake or an accident. Each one of us was intended by God to exist. He created us so that we could not only enjoy this lifetime but that we could spend eternity with Him in heaven. Our lives are precious because we are made in the image and likeness of God. We might bring to mind something of those moments in our own lives when we felt like our world was ending. Perhaps it was the end of a relationship, the death of a loved one, the end of one stage of your life. Things which seemed so familiar and helped keep us secure suddenly changed. These can be extremely difficult periods of one's life. When-ever we experience trauma like this, we keep going with the assurance that resurrection is all around us and a new way of being is on the horizon.

God Bless. Fr. Wilfred Pereppadan SCJ
