

# Simple Economics of Town Transition for PROVO

## \$3/month/person

Imagine the first city in America that can feed itself in times of disruption or anytime - within 3-5 years..

### Imagine Now

A Population of about 110,000 as Provo.

We need just 1%  
of the population for  
transitioning to something  
that makes  
so much sense.

### Imagine in one year

1% or 1,100 women  
and youth commit to start  
this movement  
donating \$3/month  
\$3,300 a month  
\$39,600/year  
**\$35,640 stays in your  
neighborhood councils 90%**  
**\$3,300 goes to the International effort 10%**

### Imagine in 3-5 years

3-5 years  
to get to tipping point.  
or 20% of the population  
22,000 people  
\$66,000 /month or \$792,000/yr.

### Imagine everyone helping

5 years  
to get to tipping point.  
or 110,000 people helping and donating  
**\$330,000 a month or \$3,960,000/yr 90% stays local or \$3,564,000 for local  
Simple Living Centers  
and \$396,000 annually to the international effort Habitat for Health.**

Imagine the increase in health  
Imagine the increase in learning  
Imagine the increase in local jobs and property values.  
A Common Sense approach to Town Transition. The POWER of simple COOPERATION and Synergy
