

The Andrea Project

Applying technology to tackle gender-based violence

How you can activate free features on your phone that can **HELP SAVE A LIFE!**

Safety Moment Series 2022

© The Andrea Project

Did you know that that your cell phone has powerful self-defense tools?

Group discussion

Imagine a scenario where you sensed you were in a precarious situation, e.g., being followed or abducted.

Is there anything you can think to do with your cell phone that might help you in that situation?

SOME GREAT TOOLS INCLUDE:

The SOS feature of the TTPS for which no data or credit needed

Sharing your location on apps like WhatsApp and Waze so you can be tracked

Find My iPhone

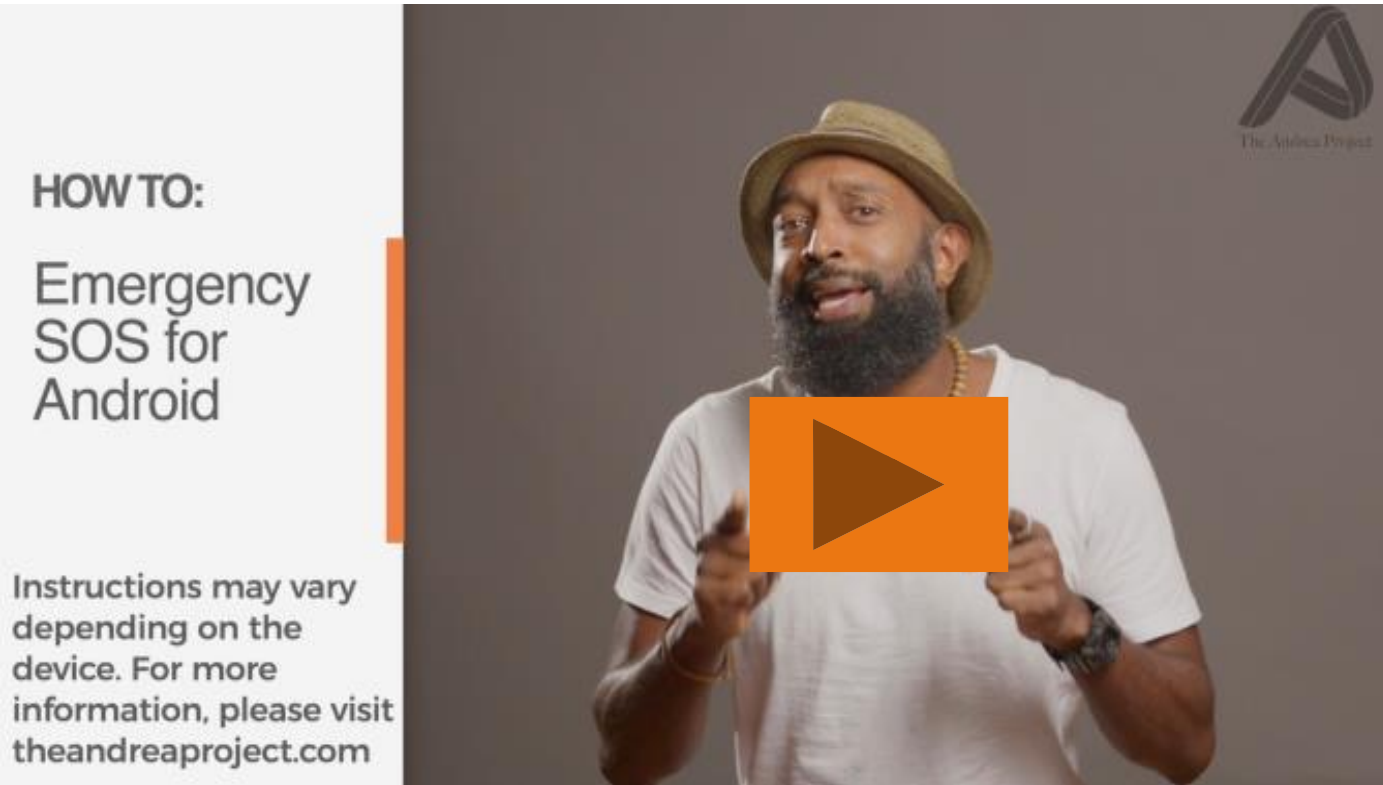

Using the Find My iPhone and Find My Android features to locate your loved ones' device

Triggering emergency SOS to contract protective services and your trusted contacts

Extending the life of your battery so you have more time to use your phone if needed

There are videos available that explain how to set up each of these features and more!

Let's have a look at one of them.

Click the play button to the left.

A CALL TO ACTION

Now you know that these features exist...what can you do to “Help Save a Life?”

1. Check out the full suite of instructional videos available in the appendix and on all social media platforms.
2. Activate the features today!
3. Share these videos with your family and friends.

About The Andrea Project

Applying technology to tackle gender based violence in Trinidad and Tobago

The Andrea Project was birthed in Feb 2021 from the outcry of the nation against an increased rate of Gender-Based Violence, which propelled for change. Collectively the group comprises of both males and females from diverse backgrounds, united in hope and belief that together a few people could make a huge impact on a social problem.
