### **\*What is Nitro?**

**Nitro** refers to the type of gas used in the carbonation process. Instead of the normal carbon dioxide (CO<sub>2</sub>), nitro beers use nitrogen. Nitrogen is largely insoluble in liquid, which gives the beer a smooth and creamy mouthfeel.

### **\*\*What is a Gose?**

A **gose** is a warm fermented beer that originated in Germany. It is usually brewed with at least 50% of the grain being malted wheat. Dominant flavors include a lemon sourness, an herbal characteristic, and a strong saltiness.
