

# Unlocking the full potential of Copilot for Microsoft 365 with Jabra

With our Copilot-ready range of professional PanaCast 50 conferencing cameras and Evolve2 headsets on board, you can unlock Copilot's full potential – supercharging your productivity every step of the way.

PanaCast 50, the first front-of-room device certified for Intelligent Speaker by Microsoft, ensures Teams can accurately attribute meeting notes and Copilot can identify and relay the assigned tasks to the right people in the room. While the powerful microphones inside our Evolve2 headsets ensure over 97% accuracy for voice pickup\* – so whether you're taking calls from a busy café or joining meetings from the office, Copilot can process every word

## SO, WHAT ARE YOU WAITING FOR?

Breeze through the five easy steps below to enable Copilot in your Microsoft Teams Room today:

1. Assign licenses
2. Send welcome email
3. Enable feedback
4. Microsoft Copilot for Microsoft 365 usage activity report
5. Sit back and enjoy the benefits of working smarter, not harder!

Head over to the Microsoft blog for step-by-step instructions to help you get started.
